

Resolution No. 145

WHEREAS, Council Order No. 544 requires the Washington Public Power Supply System (WPPSS) to obtain Council approval of the design of the temporary fish production facilities, and

WHEREAS, On May 5, 1978 Council representatives held a technical design review discussion with WPPSS, and

WHEREAS, With the modifications developed during said discussion, the temporary fish production facilities will be sufficient to their purpose;

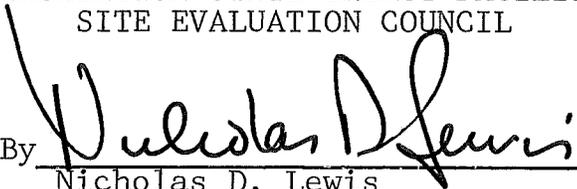

NOW, THEREFORE, BE IT RESOLVED, By the Energy Facility Site Evaluation Council that the design of the "Priest Rapids Fish Hatchery Improvements, WPPSS Project No. NGP-012" as described in drawings D-C-1-012-1 through 8 are herewith approved subject to the following:

1. The well spacing shall be adequate to secure a flow of 6.0 cubic feet per second pursuant to the criteria contained in Council Resolution No. 135 as approved by the Council on March 13, 1978, and
2. The gas stabilization units shall be designed and constructed as part of this project to ensure that the total dissolved nitrogen approaches 100% of saturation in the water supplies to the incubation, raceway and holding pond facilities, and
3. The drain outlets in the raceways shall be modified so as to allow free drainage of the total water volume.

Dated this 8th day of May 1978.
