

Resolution No. 148

*Rescinded by Resolution No. 216
dated 3-28-83*

WHEREAS, The Energy Facility Site Evaluation Council did on October 9, 1978 by EFSEC Resolution No. 147 rescind EFSEC Resolution No. 126, dated September 26, 1977 and EFSEC Order No. 543, dated November 14, 1977 and did direct specific actions for continuation supplemental to the erosion control program for the Washington Public Power Supply Systems Nuclear Projects Nos. 3 and 5; and

WHEREAS, Paragraph C of Resolution No. 147 did direct that:

"The diversion of Fuller Creek to and through the silt trap shall be discontinued and the creek returned to its original channel and approximate gradient (to the extent that alignment constraints permit) on or before midnight of October 31, 1978. (A plunge pool, with protective riprap of the banks, on the downstream side of the Zepp Road culvert is an acceptable feature in the realignment of the channel.)"; and

WHEREAS, Subsequent investigation has determined the desirability of retaining the Fuller Creek diversion to and through the silt trap through the winter of 1978-79; and

WHEREAS, The Energy Facility Site Evaluation Council did consider this matter at its regular meeting of October 23, 1978 and did approve retention of the Fuller Creek diversion to October 31, 1979;

NOW, THEREFORE, BE IT RESOLVED That so much of paragraph C of Resolution No. 147 that reads "on or before midnight of October 31, 1978" is amended to read "on or before midnight of October 31, 1979."

Dated this 23rd day of October 1978.
