

Resolution No. 215

WHEREAS, by letter dated November 22, 1982, the Washington Public Power Supply System did, in accordance with Sections III.D.6, III.F.3 and III.F.5(b) of the Site Certification Agreement for Supply System Nuclear Projects 3 and 5, request a turbidity waiver for and outline construction activities associated with work required to complete the Ranney Well System in the Flink Farm Area; and

WHEREAS, the Council recognizes that short-term increases in turbidity may occur during the course of this work;

NOW, THEREFORE, BE IT RESOLVED, by the Energy Facility Site Evaluation Council that it approves construction plans for the work outlined in the Supply System's November 19, 1982 letter and grants a temporary waiver of the water quality standards subject to the following conditions:

1. Sedimentation and erosion control activities shall be in accordance with Ebasco Services, Incorporated - Specification 3240-488.
2. No discharge of oil or grease shall be permitted to reach any receiving water.
3. Construction activity in the Chehalis River and Elizabeth Creek must be confined to the period June 1 to September 15 unless otherwise specifically approved by the Council.
4. Fill or borrow areas shall be contoured during and after the work, and monitored, to prevent the creation of fish traps.
5. Settling basins created by hay bales, filter fabric fences, or earth berms shall be maintained in efficient operating condition until they are no longer required to control turbid runoff.
6. All fill or borrow areas shall be erosion stabilized as soon as possible and in a manner equivalent to adjacent undisturbed areas.
7. The water quality criteria set forth in WAC 173.201.030(2)(c)(vi) as for turbidity is hereby modified for the period beginning 0100 hours November 23, 1982 and terminating 2400 hours October 31, 1983 subject to the following conditions:

A. All water entering into or originating within the construction area resulting from rainfall or dewatering

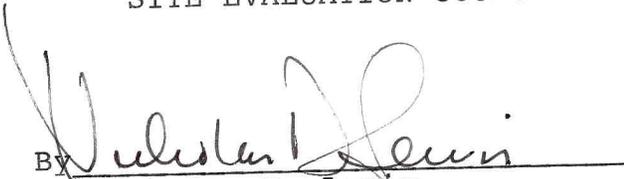

performed daily. Samples shall be analyzed for turbidity, pH, and settleable solids and the results reported to the Council monthly.

- D. In the event that the contractor or subcontractor is unable to meet the requirements listed above, or when construction activities will result in water quality degradation below the standards specified in paragraph B, the Council shall be notified immediately.
8. The State of Washington, acting by and through the Council, does certify that there is no applicable standard under 33 U.S.C. 1311, 1312, 1316 and 1317. The State does certify that any discharges to navigable waters which may result from construction of WNP-3/5 so long as done in accordance with this order or subsequent orders and the Site Certification Agreement executed on October 27, 1976 will comply with applicable state law and the limitations identified herein.

Dated this 22th day of November, 1982.
