

Emission Control (WAC 463-42-225)

WAC 463-42-225 PROPOSAL — EMISSION CONTROL.

The applicant shall demonstrate that the highest and best practicable treatment for control of emissions will be utilized in facility construction and operation. In the case of fossil fuel power plants and petroleum refineries, the applicant should deal with products containing sulphur, NO_x, volatile organics, CO, CO₂, aldehydes, particulates, and any other emissions subject to regulation by local, state, or federal agencies. In the case of a nuclear-fueled plant, the applicant should deal with optional plant designs as these may relate to gaseous emissions.

[Statutory Authority: RCW 80.50.040(1) and chapter 80.50 RCW. 81-21-006 (Order 81-5), §463-42-225, filed 10/8/81. Formerly WAC 463-42-520.]

2.11 EMISSION CONTROL (WAC 463-42-225)

Proposed emission controls for the Phase II project are discussed in detail in Section 6.1 - PSD Application, WAC 463-42-385.
