

Responses to Comments in Letter 25 from K. Parllen, Abbotsford Resident

Note: The responses listed below are numbered to correspond to the numbers shown in the right-hand margin of the preceding comment letter.

1. See Letter 3, Response to Comment 1 for discussion of air quality and human health effects.
2. See Letter 3, Response to Comment 2 for discussion of air quality in Canada.
3. See General Response D for discussion of effects on area wells.
4. See Letter 3, Response to Comment 4 and General Response B for discussion of health and socioeconomic effects of power lines.
5. See General Response I for discussion of water quality of plant effluent.
6. Thank you for your comments.
7. Please see Letter 3, Response to Comment 2 for discussion of air quality impacts in Canada and the Fraser Valley.
8. See General Response B for discussion of power lines.
9. There is potential for Canadians to be employed as construction workers and for Canadian companies to provide supplies and materials. Some benefit may come to Canadian businesses providing food and housing to construction workers living in Canada
10. Thank you for your comments.
