

## **Responses to Comments in Letter 127 from Stanley Schmidt, Resident**

*Note: The responses listed below are numbered to correspond to the numbers shown in the right-hand margin of the preceding comment letter.*

1. Thank you for your comments.
2. The 115 kV power lines that run through Whatcom County are no longer part of the project. Only the 230 kV line to Canada is included in the project. Therefore, tree removal on property in Custer would no longer be an issue.
3. The 115 kV transmission lines have been eliminated as an alternative.
4. Thank you for your comments.
