Dear Energy Facility Site Evaluation Council,

Energy Facility Site Evaluation Council:
Comments re: Tesoro Savage Petroleum Terminal, LLC; NWS-2013-962

The Tesoro Savage project is the largest crude oil-by-rail proposal in the nation and would put the communities and natural resources of Washington state and beyond at risk of oil spills, accidents, and the consequences of cumulative impacts to human health, water quality, and aquatic species.

I urge you to deny the Section 401 Water Quality permit.

- o Crude oil spills would put water resources and endangered species habitat at risk.
- o Crude oil is prone to explode, threatening communities and everything in its path.
- o Crude oil vessels would push commercial and recreational fishermen off the river.
- o Crude oil trains and vessels and inevitable spills put Columbia River water quality at risk.
- o Oil would be transported through critical protected areas, including the Columbia River Gorge National Scenic Area, and would be put at risk of oil spills and explosions and fires.

There is no need for the project. Tesoro and other pending oil terminal proposals in the Northwest would far exceed current oil consumption in the Northwest.

The project is not in the public's interest. Considering the substantial threats to the environment and public safety posed by the project, and the lack of a demonstrable need, the project is not in the public's interest and should be denied.

Sincerely,
Rick Ray

Ms. Sonia Bumpus

Energy Facility Site Evaluation Council:

Tesoro Savage's oil-by-rail shipping project would impose significant environmental and economic harm in the Columbia River estuary and beyond. The project would undermine Washington's efforts to protect water quality, recover endangered and threatened species, and support vibrant fishing communities.

I urge you to deny the Clean Water Act Section 401 certification for Tesoro Savage because:

- Crude oil spills would threaten water quality and endangered species habitat.
- The project would harm fishing on the Columbia River, a designated use under the Clean Water Act.
- The project would violate Washington's narrative and numeric water quality standards for toxic pollutants and turbidity.
- The project fails to comply with Washington's Antidegradation Policy.

Considering the project's substantial threats to water quality and public safety, EFSEC should not certify the project under Clean Water Act Section 401.

Date: Monday, August 10, 2015 8:43:43 PM

Ms. Sonia Bumpus

Energy Facility Site Evaluation Council:

Tesoro Savage's oil-by-rail shipping project would impose significant environmental and economic harm in the Columbia River estuary and beyond. The project would undermine Washington's efforts to protect water quality, recover endangered and threatened species, and support vibrant fishing communities.

I urge you to deny the Clean Water Act Section 401 certification for Tesoro Savage because:

- Crude oil spills would threaten water quality and endangered species habitat.
- The project would harm fishing on the Columbia River, a designated use under the Clean Water Act.
- The project would violate Washington's narrative and numeric water quality standards for toxic pollutants and turbidity.
- The project fails to comply with Washington's Antidegradation Policy.

Considering the project's substantial threats to water quality and public safety, EFSEC should not certify the project under Clean Water Act Section 401.

Sincerely,

Margaret Goodman

Date: Sunday, August 09, 2015 8:05:44 AM

Energy Facility Site Evaluation Council:

Tesoro Savage's oil-by-rail shipping project would impose significant environmental and economic harm in the Columbia River estuary and beyond. The project would undermine Washington's efforts to protect water quality, recover endangered and threatened species, and support vibrant fishing communities.

I urge you to deny the Clean Water Act Section 401 certification for Tesoro Savage because:

- Crude oil spills would threaten water quality and endangered species habitat.
- The project would harm fishing on the Columbia River, a designated use under the Clean Water Act.
- The project would violate Washington's narrative and numeric water quality standards for toxic pollutants and turbidity.
- The project fails to comply with Washington's Antidegradation Policy.

Considering the project's substantial threats to water quality and public safety, EFSEC should not certify the project under Clean Water Act Section 401.

Sincerely,

Rax Green

Date: Monday, August 10, 2015 8:24:41 AM

Energy Facility Site Evaluation Council:

Tesoro Savage's oil-by-rail shipping project would impose significant environmental and economic harm in the Columbia River estuary and beyond. The project would undermine Washington's efforts to protect water quality, recover endangered and threatened species, and support vibrant fishing communities.

I urge you to deny the Clean Water Act Section 401 certification for Tesoro Savage because:

- Crude oil spills would threaten water quality and endangered species habitat.
- The project would harm fishing on the Columbia River, a designated use under the Clean Water Act.
- The project would violate Washington's narrative and numeric water quality standards for toxic pollutants and turbidity.
- The project fails to comply with Washington's Antidegradation Policy.

Considering the project's substantial threats to water quality and public safety, EFSEC should not certify the project under Clean Water Act Section 401.

Sincerely,

Judith Stoltzfus

Dear Energy Facility Site Evaluation Council:

The Pacific Northwest and the Columbia River basin is vulnerable. The Tesoro Savage Project threatens people, waterways, and natural resources, including endangered salmon.

Tesoro Savage proposes the largest oil-by-rail terminal in the nation. The project's significant impacts clearly warrant a thorough EIS.

Impacts from Tesoro Savage's oil shipping project include: threats to water quality and fish and wildlife habitat; toxic air pollution; risks associated with climate change; and impacts to vulnerable communities, human health, the local and regional economy, public safety and tribal treaty rights. The Corps must also consider the cumulative effect of this project and other fossil fuel terminals, including the 14 other oil-by-rail terminals and refineries, proposed in the Northwest.

The Corps should deny the Section 404 Clean Water Act permit and the Section 10 River and Harbors Act Permit because crude oil spills would threaten water resources and endangered species habitat.

Fishing would be greatly impacted by crude oil tanker traffic

The oil shipped to the Tesoro Savage terminal and others that are proposed is for export, not domestic consumption.

Tesoro Savage's project, including the in- and over-water work proposed in the Clean Water Act and Rivers and Harbors Act permits, is not in the public interest.

Considering the project's substantial threats to the environment and public safety, and the lack of a demonstrable need, the project should be denied.

Sincerely,

Maureen Lahiff

Date: Friday, August 21, 2015 10:55:10 AM

Energy Facility Site Evaluation Council:

Tesoro Savage's oil-by-rail shipping project would impose significant environmental and economic harm in the Columbia River estuary and beyond. The project would undermine Washington's efforts to protect water quality, recover endangered and threatened species, and support vibrant fishing communities.

I urge you to deny the Clean Water Act Section 401 certification for Tesoro Savage because:

- Crude oil spills would threaten water quality and endangered species habitat.
- The project would harm fishing on the Columbia River, a designated use under the Clean Water Act.
- The project would violate Washington's narrative and numeric water quality standards for toxic pollutants and turbidity.
- The project fails to comply with Washington's Antidegradation Policy.

Considering the project's substantial threats to water quality and public safety, EFSEC should not certify the project under Clean Water Act Section 401.

Sincerely,

Tina Yaskell

Subject: Tesoro Savage Petroleum Terminal, LLC; NWS-2013-962
Date: Thursday, August 06, 2015 5:26:56 PM

Energy Facility Site Evaluation Council:

Tesoro Savage's oil-by-rail shipping project would impose significant environmental and economic harm in the Columbia River estuary and beyond. The project would undermine Washington's efforts to protect water quality, recover endangered and threatened species, and support vibrant fishing communities.

I urge you to deny the Clean Water Act Section 401 certification for Tesoro Savage because:

- Crude oil spills would threaten water quality and endangered species habitat.
- The project would harm fishing on the Columbia River, a designated use under the Clean Water Act.
- The project would violate Washington's narrative and numeric water quality standards for toxic pollutants and turbidity.
- The project fails to comply with Washington's Antidegradation Policy.

Considering the project's substantial threats to water quality and public safety, EFSEC should not certify the project under Clean Water Act Section 401.

Sincerely,

David Henderson

- The project would harm fishing on the Columbia River, a designated use under the Clean Water Act.
- The project would violate Washington's narrative and numeric water quality standards for toxic pollutants and turbidity.
- The project fails to comply with Washington's Antidegradation Policy.

Recent fires of oil trains in Ontario and West Virginia involved CPC-1232 tankers, with thicker skins and shielding over valves designed to prevent spills and fires in a derailment. It is clear that even with improved safety features, it is NOT safe to transport oil by rail. Considering the project's substantial threats to water quality and public safety, EFSEC should not certify the project under Clean Water Act Section 401. There can be no justification to allow such dangerous activity in our communities.

Sincerely,

Terry Eaton

Subject: Tesoro Savage Petroleum Terminal, LLC; NWS-2013-962
Date: Thursday, September 10, 2015 2:24:33 PM

Dear EFSEC,

Tesoro Savage's oil-by-rail shipping project would impose significant environmental and economic harm in the Columbia River estuary and beyond. The project would undermine Washington's efforts to protect water quality, recover endangered and threatened species, and support vibrant fishing communities.

I urge you to deny the Clean Water Act Section 401 certification for Tesoro Savage because:

- Crude oil spills would threaten water quality and endangered species habitat.
- The project would harm fishing on the Columbia River, a designated use under the Clean Water Act.
- The project would violate Washington's narrative and numeric water quality standards for toxic pollutants and turbidity.
- The project fails to comply with Washington's Antidegradation Policy.

Considering the project's substantial threats to water quality and public safety, EFSEC should not certify the project under Clean Water Act Section 401.

Sincerely,

Karen FitzGerald

Subject: Tesoro Savage Petroleum Terminal, LLC; NWS-2013-962
Date: Thursday, August 27, 2015 8:26:16 AM

Energy Facility Site Evaluation Council:

Tesoro Savage's oil-by-rail shipping project would impose significant environmental and economic harm in the Columbia River estuary and beyond. The project would undermine Washington's efforts to protect water quality, recover endangered and threatened species, and support vibrant fishing communities.

I urge you to deny the Clean Water Act Section 401 certification for Tesoro Savage because:

- Crude oil spills would threaten water quality and endangered species habitat.
- The project would harm fishing on the Columbia River, a designated use under the Clean Water Act.
- The project would violate Washington's narrative and numeric water quality standards for toxic pollutants and turbidity.
- The project fails to comply with Washington's Antidegradation Policy.

Considering the project's substantial threats to water quality and public safety, EFSEC should not certify the project under Clean Water Act Section 401.

Sincerely,

Ellen McConnell
