Subject: Comment on Docket No. EF-131590, Application No. 2013-01

Nov 14, 2013

Mr. Stephen Posner
P.O. Box 43172
Olympia, WA 98504-3172

Dear Mr. Posner,

I'm writing regarding Docket No. EF-131590, Application No. 2013-01 to urge the Washington Energy Facility Site Evaluation Council (EFSEC) to assess the full environmental and public safety impact of the joint Tesoro-Savage proposal to turn the Port of Vancouver into a major crude oil export terminal.

If approved, the plan would result in 380,000 barrels of oil each day being shipped through Spokane, the Columbia River Gorge National Scenic Area, Vancouver and other Northwest communities. Oil-by-rail is a bad deal for Washington State. The project comes at a steep price for rail communities and the Columbia River, yet offers few jobs in return. Based on the far reaching impacts of this project, I urge you to recommend the rejection of Tesoro-Savage's proposal.

The public safety and environmental impacts of this proposal deserve close scrutiny. For example, EFSEC must assess:

1) The potential safety and environmental impacts of a large train-related oil spill or explosion along the rail route in Washington and beyond. Recent derailment disasters in Lac-Mégantic, Quebec and Alabama have shown that these risks are far too real. The tragedy in Quebec, in particular, highlighted the extreme danger of the same type of oil and tankers that would be traveling through our communities. Forty-seven people died in that explosion, which also devastated the town.

2) The increased risk of an oil tanker spill on Washington State waters and along the shipping route.

3) The transportation and public health impacts of additional unit train traffic through communities along the proposed oil-by-rail route. This includes evaluating emergency response capabilities in Vancouver, where oil trains would deliver and store oil, and other communities along the rail and shipping route.

4) The project's impact on climate change. This analysis should include climate change impacts from crude oil as well as tar sands oil from cradle to grave.

5) The impact of the project's cradle-to-grave CO2 emissions on the viability of the large oyster industry in Washington State.

After carefully considering the safety, environmental, and climate risks associated with the proposed oil terminal, I respectfully ask you to recommend the rejection of Tesoro-Savage's application.

The Pacific Northwest is a treasure trove of precious natural beauty and resources. Our inheritance has been clean, abundant water, numerous species of fish and wildlife, chinook salmon being just one example of many, vast forests of sustainable timber, and this list could go on for pages. Sending oil by train through the Pacific Northwest is reckless and dangerous. It benefits no one but the owners of oil and railroads. I live in Columbia City, Oregon, and shop mostly in St Helens, Oregon.

Long rail trains would cut our communities in half, and I am certain the same would be true for communities in Washington State. Moreover, as a nation we should not be exporting our non-renewable natural resources. While the natural beauty and resources of the Pacific Northwest are precious, they are also delicate. They must be managed, preserved, and carefully husbanded. Help protect our heritage. Do not allow the transport of oil by rail through Washington State. Thank you.

Sincerely,

Mr. Peter Luciano
