**No Oil Terminal in Vancouver**

To the Energy Facilities Site Evaluation Council (EFSEC) and Governor Inslee.

I urge you to address the following concerns regarding the proposed oil terminal in Vancouver:

- ✍ Oil Train Explosions
- ✍ Derailments and our salmon industry
- ✍ Jobs lost because of the oil trains
- ✍ Health effects of barge venting
- ✍ Conservation disincentives
- ✍ Industry history and attitudes
- ✍ Destructive extraction methods
- ✍ Sea-level rise
- ✍ CO2 and our oyster industry
- ✍ Rescue tugs
- ✍ 80,000 unsafe tanker cars in U.S. fleet
- ✍ Vague emergency plans
- ✍ Inadequate liability of oil trains
- ✍ Inadequate regulation for oil barges
- ✍ Lost property values

I'm also concerned about: burning natural gas in the Bakken oil fields - both the huge pollution of air & the huge waste of a marketable fuel. I'm worried about all aspects of climate change & the changing pH of the oceans & the lack of congressional oversight

To the signer: Your contact information allows the local sponsors to notify you of future oil train hearings.

**No Oil Terminal in Vancouver**

To the Energy Facilities Site Evaluation Council (EFSEC) and Governor Inslee.

I urge you to assess the full impact of Tesoro Savage's proposal to bring 360,000 barrels of crude oil each day by rail through the Columbia River Gorge National to a shipping terminal in Vancouver. This project comes at a steep price for rail communities and yet offers few jobs in return.

Two oil trains have already exploded within four months killing 47 people. In the face of those risks, downtown developments in Washougal, Camas, and Vancouver will be less attractive to investors.

The trains will cross dozens of salmon bearing streams. One derailment could destroy our salmon industry for decades.

Accidents happen . . . like the Exxon Valdez. Increased shipping traffic increases the risk.

The jobs of 8000 oystermen in Willapa Bay have already been jeopardized by CO2 emissions. We must not build new oil infrastructure. We don't need the oil. Sixteen models of electric cars are here.

Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's proposal.

**No Oil Terminal in Vancouver**

To the Energy Facilities Site Evaluation Council (EFSEC) and Governor Inslee.

I urge you to assess the full impact of Tesoro Savage's proposal to bring 360,000 barrels of crude oil each day by rail through the Columbia River Gorge National to a shipping terminal in Vancouver. This project comes at a steep price for rail communities and yet offers few jobs in return.

Two oil trains have already exploded within four months killing 47 people. In the face of those risks, downtown developments in Washougal, Camas, and Vancouver will be less attractive to investors.

The trains will cross dozens of salmon bearing streams. One derailment could destroy our salmon industry for decades.

Accidents happen . . . like the Exxon Valdez. Increased shipping traffic increases the risk.

I urge you to assess the full impact of Tesoro Savage's proposal to bring 360,000 barrels of crude oil each day by rail through the Columbia River Gorge to a shipping terminal in Vancouver. This project comes at a steep price for rail communities and yet offers few jobs in return.

Two oil trains have already exploded within four months killing 47 people. In the face of those risks, downtown developments in Washougal, Camas, and Vancouver will be less attractive to investors.

The trains will cross dozens of salmon bearing streams. One derailment could destroy our salmon industry for decades.

Accidents happen . . . like the Exxon Valdez. Increased shipping traffic increases the risk.

The jobs of 3000 oystermen in Willapa Bay have already been jeopardized by CO2 emissions. We must not build new oil infrastructure. We don't need the oil. Sixteen models of electric cars are here.

Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's proposal.

**No Oil Terminal in Vancouver**

I urge you to assess the full impact of Tesoro Savage's proposal to bring 360,000 barrels of crude oil each day by rail through the Columbia River Gorge to a shipping terminal in Vancouver. This project comes at a steep price for rail communities and yet offers few jobs in return.

Two oil trains have already exploded within four months killing 47 people. In the face of those risks, downtown developments in Washougal, Camas, and Vancouver will be less attractive to investors.

The trains will cross dozens of salmon bearing streams. One derailment could destroy our salmon industry for decades.

Accidents happen . . . like the Exxon Valdez. Increased shipping traffic increases the risk.

The jobs of 3000 oystermen in Willapa Bay have already been jeopardized by CO2 emissions. We must not build new oil infrastructure. We don't need the oil. Sixteen models of electric cars are here.

Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's proposal.

**No Oil Terminal in Vancouver**

To the Energy Facilities Site Evaluation Council (EFSEC) and Governor Inslee.

I urge you to address the following concerns regarding the proposed oil terminal in Vancouver:

- Oil Train Explosions
- Derailments and our salmon industry
- Jobs lost because of the oil trains
- Health effects of barge venting
- Conservation disincentives
- Industry history and attitudes
- Destructive extraction methods
- Sea-level rise
- CO2 and our oyster industry
- Rescue tugs
- 80,000 unsafe tanker cars in U.S. fleet
- Vague emergency plans
- Inadequate liability of oil trains
- Inadequate regulation for oil barges
- Lost property values

**No Oil Terminal in Vancouver**

To the Energy Facilities Site Evaluation Council (EFSEC) and Governor Inslee.

I urge you to assess the full impact of Tesoro Savage's proposal to bring 360,000 barrels of crude oil each day by rail through the Columbia River Gorge National to a shipping terminal in Vancouver. This project comes at a steep price for rail communities and yet offers few jobs in return.

Two oil trains have already exploded within four months killing 47 people. In the face of those risks, downtown developments in Washougal, Camas, and Vancouver will be less attractive to investors.

The trains will cross dozens of salmon bearing streams. One derailment could destroy our salmon industry for decades.

Accidents happen . . . like the Exxon Valdez. Increased shipping traffic increases the risk.

The jobs of 3000 oystermen in Willapa Bay have already been jeopardized by CO2 emissions. We must not build new oil infrastructure. We don't need the oil. Sixteen models of electric cars are here.

Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's proposal.

**No Oil Terminal in Vancouver**

To the Energy Facilities Site Evaluation Council (EFSEC) and Governor Inslee.

I urge you to address the following concerns regarding the proposed oil terminal in Vancouver:

- Oil Train Explosions
- ✓ Derailments and our salmon industry
- Jobs lost because of the oil trains
- Health effects of barge venting
- Conservation disincentives
- ✓ Industry history and attitudes
- Destructive extraction methods
- Sea-level rise
- ✓ CO2 and our oyster industry
- Rescue tugs
- 80,000 unsafe tanker cars in U.S. fleet
- Vague emergency plans
- Inadequate liability of oil trains
- ✓ Inadequate regulation for oil barges
- Lost property values
