David,

Can you help with getting a connection with others in the Department who can help us collectively make a statement/decision as to the wildlife value of the habitat? This will give us all a sense of how useful/valuable this parcel offer is.

Travis Nelson

My only question on this site is the fact that SDS chose it for us vs asking about options of sites we might be interested in. I have not seen the site and it may very well be a good one. It seems pretty useless to them considering the location. They have lots of prime habitat closer to either our wildlife area or the project site. It is close to DNR land but anything we get would be managed by our wildlife area and it would be good to consult the manager about sites we would pick up....

Let me know your thoughts on the proposed mitigation – attached.
