0 .5
Approximate Scale in Miles

- BP soil boring
- water wells
- BP monitoring well depth = < 100 feet (approximate location)
- well depth = 0-250 feet
- well depth = 251-500 feet
- well depth = 501-750 feet
- well depth = > 750 feet
- range/township boundary and designation
- groundwater flow direction
- water table elevation contour (feet above mean sea level)
- surface water drainage basin boundary
