## VI. Stormwater Pollution Prevention Plan (SWPPP)

Do **not** submit your SWPPP with your application. You **must** develop a SWPPP that includes a narrative description and drawings of best management practices to prevent stormwater pollution prior to starting construction activity.

## VII. Discharge/Receiving Water Information

Indicate whether your site's stormwater and/or dewatering water could enter surface waters, **directly** and/or **indirectly**:

- Water will discharge directly or indirectly (through a storm drain system or roadside ditch) into a surface water body (bodies). Water body means wetlands, named and unnamed creeks, streams, rivers, ponds, lakes, estuaries, and salt waters and all other surface waters and water courses.

If the discharge is to a storm sewer system, the name of the operator of the storm sewer system (e.g., City of Tacoma): \_\_\_\_\_

- To ground with 100% infiltration, with no potential to reach surface waters under any conditions.

### Provide locations on the next page or on a separate sheet, if necessary.

NOTE: If your stormwater discharges to a storm sewer system operated by the City of Seattle, King County, Snohomish County, City of Tacoma, Pierce County, or Clark County, you must **also** submit a copy of this NOI to the appropriate jurisdiction.

If your project includes dewatering, you **must** include dewatering plans and discharge locations in your site Stormwater Pollution Prevention Plan.

### Location of Discharge into Surface Water Body

Enter the water body name and latitude/longitude\* of the point(s) where the site has the potential to discharge into a water body (enter all locations).

- Include the names and locations of both direct and indirect discharges to surface water bodies; even if the risk of discharge is low or limited to periods of extreme weather.
- Water body means wetlands, named and unnamed creeks, streams, rivers, ponds, lakes, estuaries, and salt waters and all other surface waters and water courses.
- Some large construction projects (for example, subdivisions, roads, or pipelines) may discharge into several water bodies.
- If the creek or tributary is unnamed, use a format such as "unnamed tributary to Deschutes River".
- **Attach a separate list if necessary.**

Surface Water Body Name	Latitude degrees, minutes, seconds	Longitude degrees, minutes, seconds
	° ' N	° ' W
	° ' N	° ' W
	° ' N	° ' W
	° ' N	° ' W

*If your site discharges to a water body that is on an impaired waterbodies list (i.e., 303(d) list) for turbidity, fine sediment, high pH, or phosphorus, you must sample for more parameters. Ecology will notify you if any additional sampling requirements apply. Information on impaired water bodies is available online at: <http://www.ecy.wa.gov/programs/wq/stormwater/construction/impaired.html>.*
