Subject: Reference Application No. 2013-01/Docket No. EF-131590: Please reject the proposed Tesoro Savage oil export terminal project

Dear Governor Inslee and Washington EFSEC:

I urge you to assess the full impact of Tesoro Savage's proposal to ship 360,000 barrels of oil each day through Spokane, the Columbia River Gorge National Scenic Area, Vancouver and the Columbia River. Oil-by-rail and export by ship is a bad deal for Washington State and the entire Northwest region. The project comes at a steep price for rail and river communities throughout the state and along the Columbia River, yet offers few jobs in return. Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's unprecedented proposal.

The public safety and environmental impacts of the state's largest pipeline-on-wheels proposal deserve close scrutiny. For example, EFSEC must assess:

- The potential impacts of a large train-related oil spill along the rail route in Washington and beyond.
- The transportation and public health impacts of additional unit train traffic through communities along the proposed oil-by-rail route. This includes evaluating emergency response capabilities in Vancouver, where oil trains would deliver and store oil, and other communities along the rail and shipping route.
- The increased risk of an oil tanker spill on Washington State waters and along the shipping route.
- The project's impact on climate change. This analysis should include climate change impacts from crude oil as well as tar sands oil from cradle to grave.

After carefully considering the safety, environmental, and climate risks associated with the project, I respectfully ask you to deny Tesoro Savage's application.

Thank you.

John Frey

Subject: Reference Application No. 2013-01/Docket No. EF-131590: Please reject the proposed Tesoro Savage oil export terminal project

Dear Governor Inslee and Washington EFSEC:

I am writing to ask you to assess the full impact of Tesoro Savage's proposal to ship 360,000 barrels of oil each day through Spokane, the Columbia River Gorge National Scenic Area, Vancouver and the Columbia River. This plan for oil-by-rail and export by ship is a bad idea for Washington State and the entire Northwest region. The project comes at a steep price for rail and river communities throughout the state and along the Columbia River while offering few jobs in return. Based on the far reaching negative impacts of this project, I urge you to deny Tesoro Savage's unprecedented proposal for this oil export terminal.

The public safety and environmental impacts of this proposal for the state's largest pipeline-on-wheels deserve close scrutiny. For example, EFSEC must assess:

- The potential impacts of a large train-related oil spill along the rail route in Washington and beyond.
- The transportation and public health impacts of additional unit train traffic through communities along the proposed oil-by-rail route. This includes evaluating emergency response capabilities in Vancouver, where oil trains would deliver and store oil, as well as other communities along the rail and shipping route.
- The increased risk of an oil tanker spill on Washington State waters and along the shipping route.
- The project's impact on climate change. This analysis should include climate change impacts from crude oil as well as tar sands oil from cradle to grave.

After carefully considering the safety, environmental, and climate risks associated with the project, I respectfully ask you to deny Tesoro Savage's application.

Thank you.

Oil-by-rail and export by ship is a bad deal for Washington State and the entire Northwest region. The project comes at a steep price for rail and river communities throughout the state and along the Columbia River, yet offers few jobs in return. Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's unprecedented proposal.

The public safety and environmental impacts of the state's largest pipeline-on-wheels proposal deserve close scrutiny. For example, EFSEC must assess:

- The potential impacts of a large train-related oil spill along the rail route in Washington and beyond.
- The transportation and public health impacts of additional unit train traffic through communities along the proposed oil-by-rail route. This includes evaluating emergency response capabilities in Vancouver, where oil trains would deliver and store oil, and other communities along the rail and shipping route.
- The increased risk of an oil tanker spill on Washington State waters and along the shipping route.
- The project's impact on climate change. This analysis should include climate change impacts from crude oil as well as tar sands oil from cradle to grave.

After carefully considering the safety, environmental, and climate risks associated with the project, I respectfully ask you to deny Tesoro Savage's application.

Thank you.

Subject: Reference Application No. 2013-01/Docket No. EF-131590: Please reject the proposed Tesoro Savage oil export terminal project

Dear Governor Inslee and Washington EFSEC:

I am not a resident of your state, but as a resident of Texas I know a little about living in a place where the oil industry owns the government and oil exploitation comes first and the health, lives, and rights of citizens are somewhere far down the list of priorities. Here, we have fracking wrecking the land, air, and water with pollution and spills, pipelines all over, massive polluting petrochemical complexes all along the gulf coast.

I grew up here, but I will be glad to leave Texas, especially for the reasons stated above. I'm thinking about moving to the northwest or New England someday. I want to go to a place where people care about their surroundings, environment, clean air and clean water... I would really hate to see a state like Washington ruin some of what makes it special with this proposed oil shipping and processing activity.

The Texas gulf coast between Houston and Corpus Christi is known as the 'cancer crescent' because the petrochemical pollution and cancer rates are so bad. I'm afraid Texas is a lost cause, but I'd hate to see your state go down that road.

I urge you to assess the full impact of Tesoro Savage's proposal to ship 360,000 barrels of oil each day through Spokane, the Columbia River Gorge National Scenic Area, Vancouver and the Columbia River. Oil-by-rail and export by ship is a bad deal for Washington State and the entire Northwest region. The project comes at a steep price for rail and river communities throughout the state and along the Columbia River, yet offers few jobs in return. Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's unprecedented proposal.

Subject: Docket No. EF-131590 Application No. 2013-01 Tesoro Savage Vancouver Energy Distribution Terminal Comments

Dec 4, 2013

Energy Facility Site Evaluation Council
WA

Dear Site Evaluation Council,

Please deny the permit for the Tesoro Savage Vancouver Energy Distribution Terminal.

Broad public sentiment across the Northwest OPPOSES the Tesoro Savage terminal proposal that would transport 360,000 barrels of oil per day through the Columbia Gorge into a massive industrial oil terminal that Tesoro Savage wants to develop in Vancouver.

This project does not meet any need for fuel in the Northwest, and yet poses serious environmental risks in the rail transport through the Columbia Gorge, and especially to the Vancouver metropolitan area and the Columbia River in the vicinity of the proposed terminal.

Oil spills and leaks present dangers to aquatic wildlife and waterfowl, as we know painfully well from the many oil spills, large and small, that have occurred in the past 20 years, on rivers and in the oceans.

The financial costs of clean up and remediation are astronomical, and the corporations responsible invariably drag out their appeals and legal stonewalling for years, leaving taxpayers to clean up the mess and then hope to be reimbursed if and when the companies finally pay up. The since any of us could easily (maybe more easily) volunteer with other organizations and attend other activities and events around town.
The harms inflicted on wildlife cannot be undone.

Using the Port of Vancouver for this oil terminal would eliminate any chance of the Port being developed to enhance and enrich the local community. Just as fracked landscapes are not suitable for national parks and agricultural uses, an industrial oil terminal would leave the Port of Vancouver unsuitable for any human uses that improve life for Washingtonians.

I strongly urge you to deny this permit, in order to protect the Columbia River and Gorge communities and the people and communities of Vancouver and Clark County.

Thank you for considering these comments and including them into the official record.

Sincerely,

Ms. Betsy Toll

Subject: Reference Application No. 2013-01/Docket No. EF-131590: Please reject the proposed Tesoro Savage oil export terminal project

Dear Governor Inslee and Washington EFSEC:

I urge you to assess the full impact of Tesoro Savage's proposal to ship 360,000 barrels of oil each day through Spokane, the Columbia River Gorge National Scenic Area, Vancouver and the Columbia River. Oil-by-rail and export by ship is a bad deal for Washington State and the entire Northwest region. The project comes at a steep price for rail and river communities throughout the state and along the Columbia River, yet offers few jobs in return. Based on the far reaching impacts of this project, I urge you to deny Tesoro Savage's unprecedented proposal.

The public safety and environmental impacts of the state's largest pipeline-on-wheels proposal deserve close scrutiny. For example, EFSEC must assess:

- The potential impacts of a large train-related oil spill along the rail route in Washington and beyond.
- The transportation and public health impacts of additional unit train traffic through communities along the proposed oil-by-rail route. This includes evaluating emergency response capabilities in Vancouver, where oil trains would deliver and store oil, and other communities along the rail and shipping route.
- The increased risk of an oil tanker spill on Washington State waters and along the shipping route.
- The project's impact on climate change. This analysis should include climate change impacts from crude oil as well as tar sands oil from cradle to grave.

After carefully considering the safety, environmental, and climate risks associated with the project, I respectfully ask you to deny Tesoro Savage's application.

Thank you.

Kirsten McMurray

Dear Governor Inslee and Washington EFSEC:

Too many industries, marine and wildlife, the environment, etc., are at risk. No winners here except for the oil companies. How many billion dollar generational industries were lost because of the BP Gulf oil spill? What was the trickle effect to real estate and the generational, local economies . . . in the trillions in just these few years since the BP spill?!!!

I urge you to assess the full impact of Tesoro Savage's proposal to ship 360,000 barrels of oil each day through Spokane, the Columbia River Gorge National Scenic Area, Vancouver and the Columbia River.
