Subject: SEPA consultation per WAC 197-11-335

To whom it may concern,

EFSEC is in the process of reviewing an application from Tuusso for a proposed collection of solar facilities (five sites in total) under the project name Columbia Solar, located in Kittitas County. EFSEC and our consultant have completed our review of information received from the applicant, and have drafted mitigation measures we believe would be appropriate to impose on the proposed facilities in an MDNS. In addition to review by our agency contractors, we are requesting formal **SEPA** consultation with your agency, per WAC 197-11-335 and 197-11-550.

Please review the attached SEPA Checklist and draft mitigation measures; we are also attaching a link to additional application materials to assist in your review of the checklist. Please send all comments to Sonia Bumpus at Sonia.bumpus@utc.wa.gov by **COB February 12**. Questions or concerns may also be addressed to Sonia, either via email or by phone (360.664.1363).

Link to full application materials on EFSEC Website:
