Comment subject/Issue: Irreparable harm to property owners

Comment:

I am a concerned property owner. Your plan creates a WIN-LOSE situation to the property owners and families of this community. Your plan harms our way of living. It violates our right to our enjoyment of life.

As a property owner in this Rural farming community, your wind towers will de-value our properties, our lives and our freedom to live as we chose before you interfered - SELFISHLY -

what you are doing is morally wrong and unjust.

When will TOO much ever be enough for selfish and greedy companies who care nothing about people like me. Please STOP destroying

(Please use reverse side if you run out of room)

Thank you for our participation!

the home and farm land where I have chosen to live. A place I purchased for a purpose of living the RIGHT WAY.

Mature and honorable people do not do anything to harm the lives of others involved with anything a person does. People, such as your selves, who capitalize and profiter by what your "mega structures" will do, with NO REGARD for our lives or regard for what the impact of these wind towers will have on all life and wild life - is wrong.

Again, Please STOP what you want to do here.

you do not live here - I DO. I did not ask for your company to come here. I do not need your company to interfere with my life - just as I did not interfere with where you chose to live - where is that? Are there wind turbines on your property?

Have you seen my property? Have you seen where and how I live? Do you know how much my property is worth? Do you know how much your project will decrease my property value? Do you know how much harm you are causing to my life?

Are you aware of how the people who live here think and feel about what you are doing?

Do you care? Would you live in an area impacted by these wind turbines? Could you live where I live? Will you pay me for being harmed by your project?

Thank you for your participation!

Sincerely,
Emilie Seibe
