

RESOLUTION NO. 186

WHEREAS, By letter dated October 2, 1980 the Washington Public Power Supply System did request an interpretive verification of Condition S.1.B. of National Pollutant Discharge Elimination System Permit No. WA-002515-1 with regard to pre-operational discharges from the cooling tower facilities; and

WHEREAS, By the same letter the Supply System did propose an interim, pre-operational discharge monitoring program; and

WHEREAS, The cooling towers are not now under the thermal and chemical conditions of plant operation and are being run solely for testing purposes; and

WHEREAS, The water quality concerns cannot yet be at issue;

NOW, THEREFORE, BE IT RESOLVED, By the Energy Facility Site Evaluation Council that until the commercial operation of the Washington Nuclear Project No. 2 of the Washington Public Power Supply System, the pre-operational monitoring program, as proposed in the above letter and attached hereto shall be deemed to satisfy the monitoring requirements of Condition S.1.B. of National Pollutant Discharge Elimination System Permit No. WA-002515-1.

Dated this 24th day of November 1980.
