WHEREAS, Council Resolution No. 166 required the Washington Public Power Supply System to analyze and present preoperational aquatic data collected for WNP-2 to the Council prior to plant operation; and

WHEREAS, By letter dated September 10, 1982, the Supply System did submit for Council review a draft report entitled, "Technical Review of the Aquatic Monitoring Program of WNP-2, September 1982"; and

WHEREAS, The Council has reviewed the preoperational data and proposed modification to the aquatic operational monitoring program and finds that the recommended changes to the Aquatic Life Program are reasonable and necessary for the purpose of environmental monitoring and will adequately protect or further reduce impacts on the environment; and

WHEREAS, The Supply System has subsequently petitioned, by letter of October 6, 1982, to revise the WNP-2 Aquatic Monitoring Program;

NOW, THEREFORE, BE IT RESOLVED, That the Energy Facility Site Evaluation Council hereby approves the attached Revision No. 2 to the WNP-2 Ecological Monitoring Program, Attachment I, Sections IV and V of the Site Certification Agreement, provided that prior to plant operation the operational manual governing the release of biocide chlorine from the cooling tower basins be submitted to and approved by the Council.

Dated this 8th day of November, 1982.
