Re: Updated Application for Site Certification, Horse Heaven Wind Project

Dear Kathleen:

Horse Heaven Wind Farm, LLC (Applicant) is pleased to submit this updated Application for Site Certification (ASC) for the Horse Heaven Wind Farm (Project) to the Washington Energy Facility Site Evaluation Council (EFSEC). Our original application, submitted on February 8, 2021, has been updated to incorporate additional information and clarifications to the Project during the process of EFSEC review and data request responses. This updated application does not alter the scope of facility components proposed for the Project. The intent of preparing this updated application is to provide a single centralized location where EFSEC and the public can find all of the information in one place, to minimize the need to refer back to multiple data requests and responses. The appendices also include reports for additional surveys that were completed after submittal of the initial application. Electronic copies of the updated application, including confidential as well as public (redacted) versions of certain identified figures and reports, are being provided at this time. Hard copies will be provided on request by EFSEC.

We look forward to working with you as the application process moves through its next steps. If you have any questions, or require further information, please contact Dave Kobus at: dave@scoutcleanenergy.com

Sincerely,

A handwritten signature in blue ink that reads "Michael Rucker".

Michael Rucker
President and Chief Executive Officer, Horse Heaven Wind Farm LLC
