Date: Monday, June 5, 2023 4:05:20 PM

External Email

Dear EFSEC Director, Sonia Bumpus and EFSEC members and staff,
Thank you for your work in directing a very controversial and critical issue that will determine the future of a very important area of Washington State and the quality of life for many local residents of the Tri-Cities.

As a former Planning, Building and Economic Development official of a large jurisdiction, I understand the difficulties you are facing in directing the outcome of the Horse Heaven Hills project. Please allow as much community input as possible to frame the many complex concerns this project creates. The citizens of our Tri-Cities area need to be heard completely and the **Tri-Cities CARES** group (made up of people involved in this project from the beginning) is providing an essential forum for your better understanding of the critical risks we are facing, and **needs to be part of the ongoing discussion.**

Meanwhile, the vital science behind Green Energy is changing rapidly, so great care needs to be observed as decisions are made that will greatly impact the details of our lives in this area. More study and more information from more people is what our Democracy is all about in creating the best outcomes.

Thank you again for your time and work,

[Frank Kliewer](#)

RE: Tri-Cities CARES (TCC)

We support the work of Tri-Cities CARES (TCC) for us Tri-Cities citizens and residents in the Horse Heaven Wind Project. We encourage their continued work as adjudicators in this project.

We oppose the expensive, inefficient, wind turbines that are as tall as the Space Needle. If any wind turbines are installed, they should be the much smaller, less expensive, and quieter tulip-shaped wind machines.

Sincerely,

William and Laura Wilson

Subject: Windmills on Horse Heaven
Date: Monday, June 5, 2023 4:47:54 PM

External Email

Dear EFSEC:

I strongly support and ask that you will join our efforts as a resident of the Tri-Cities to preserve our Horse Heaven Hills. It is my express wish that wildlife, aesthetics and our way of life is honored and do not wish to see any more windmills on our hills. The windmills are not only an ugly sight, they contribute to killing massive numbers of birds and pollute with noise and lights.

I have added my voice to Tri-Cities CARES as they have been doing an exceptional job of representing local communities in the Horse Heaven Wind Project adjudication process. I want to confirm my support for their intervention in the process.

Thank you for your assistance.

Sincerely,

Barbara L. Mannion

External Email

Dear EFSEC & Director, Sonia Bumpus,

I appreciate everything that Tri-Cities CARES has done thus far in representing our community during the adjudication process as an Intervenor. Limiting Tri-Cities CARES participation is an insult and is in direct conflict with SEPA and the 2021 State Energy Strategy commitments to public participation. These issues, wildlife, aesthetics, human and domestic animal health, safety, quality of life, lack of local control, etc., that Tri-Cities CARES is focusing on are extremely important to me and many others in this community! Tri-Cities CARES has my full support to continue representing me and the community in which I live as an Intervenor. Thank you.

Hello,

I have been a resident of Tri-Cities, WA (Benton County/South Kennewick) for 25 years and am sending an email of support for the Tri Cities CARES (TCC) organization. I fully endorse TCC as representing my family's interests as residents of the Tri-Cities. I further support their representation to intervene regarding the proposed Horse Heaven Hills Solar/Wind Farm project.

The Tri-Cities would be negatively impacted by the construction of such a large scale solar & wind farm so close to so many residential homes as well as the negative impact on wildlife and migratory patterns of many bird species. I completely trust TCC to represent us as residents of the Tri-Cities in their continued efforts of opposition to this project.

Thank you for your consideration,
Jackie Banning

Date: Tuesday, June 6, 2023 8:28:27 AM

External Email

I am in support of the work of Tri-Cities CARES (TCC), and I oppose any wind turbines on the Horse Heaven Hills! Wind energy is NOT eco-friendly and it is too expensive! To build a wind turbine is about the same as drilling an oil well. For a wind turbine to produce energy equivalent to 1 barrel of oil costs about \$200 plus batteries and PAO synthetic oil. An oil well can produce 10 barrels of oil per hour costing about 50¢ to run the pump. Wind turbines endanger wildlife, and currently with $\pm 7\%$ of the nation being supplied with wind energy, already 500,000 birds are killed each year from wind turbine blade collisions—endangered hawks, falcons, owls, geese, ducks and eagles. Those deaths will only continue to increase with more harmful turbines.

Goodmorning,

My name is Bill McKay and I am the Mayor of Kennewick, a business owner in Kennewick and most of my kids and grandkids live in the City of Kennewick. The CARES organization has done an outstanding job of representing the large majority views of the people who live in Kennewick. There is no question in my mind that if this wind farm project were to go to the voters it would lose with 75 to 80% voting against it. The reasons for the citizens' opposition to this project are endless.

We appreciate you recognizing the CARES group as an intervenor, they represent a very large majority of the residents of Kennewick.

Respectfully,
Bill McKay
City of Kennewick Mayor

Dear EFSEC: 6/6/23

Tri-Cities CARES has been doing a great job of representing local communities in the Horse Heaven Wind Project adjudication process. I confirm my support for Tri-Cities CARES' intervention in the process.

Please enter on the EFSEC public record that I support Tri-Cities CARES efforts in representing me as a resident of the Tri-cities region and expect EFSEC to treat Tri-Cities CARES as representing me.

I will, of course be following these proceedings and putting in my 2 cents on the Horse Heaven Wind & Solar fiasco being forced on Tri-Cities inhabitants that do not want the project because of the environmental, scenic, geological, & property value damage it will do to the area as well as the damage it will do to our electrical grid system as the power is not needed and power balancing will have to be done to assure the grid stays operational. Further, the project is not cost effective without huge taxpayer subsidies (i.e., a mis-use of taxpayer funds). And the use of child labor by the CCP to extract the rare earths (i.e., hazardous materials) used in the wind & solar materials & support materials as well as the decontamination and decommissioning aspect & assured funding of such is not addressed. And the contamination & preservation of good farm land is not addressed along with the lack of access to water for the project. These issues make the H3 Wind/Solar "project" inappropriate for the Tri-Cities region.

Thank you for adding my name to the list that Tri-Cities Cares represents.

Subject: Prevent wind turbines in the Horse Heaven Wind Project
Date: Tuesday, June 6, 2023 3:30:43 PM

External Email

I am a home-owner who has lived in Richland, Washington, for 45 years. I am against expensive and inefficient wind turbines. Count me as one of the many Tri-Cities residents who support the work of the Tri-Cities CARES (TCC) organization working to prevent wind turbines in the Horse Heaven Wind Project. Where would all of the refined oil come that would be needed every year for every turbine if a wind farm were created? Aren't we supposed to be reducing our fossil fuel footprint? We're already running out of special landfill spaces that would be needed for those gigantic fiber composite blades after every turbine's 20-year lifetime. And guess what else? They're already running out of these special landfill spaces for blades that have already exceeded their usefulness. All that money would be poured down the drain to pay for tons of iron ore, concrete and non-recyclable plastic, equipment, installation, service, maintenance and eventual removal after 20 years. WHAT A WASTE!

Sincerely,

C J Udell

Director Bumpus: Please know I fully and totally support Tri-Cities CARES efforts in representing me as a resident of the Tri-Cities region.

With regards to the Horse Heaven Wind Project adjudication process, I firmly believe Tri-Cities CARES has been doing an outstanding and accurate job of presenting the facts and truth while representing the citizens of the Tri-Cities area.

Therefore, I want to confirm my support for their intervention in the process.

I do not enjoy writing what I'm going to say hereinafter, but I can't be silent on this matter. I find it sad and infuriating that a few "outsiders" are arrogant enough to think they can work to shove (force) a project like the HHH windfarm down our throats when the majority of the Tri-

Cities citizens do NOT want this expensive, resource wasteful, eye sore spoiling the beauty of where we live, and devaluing the value of some people's largest asset - their homes - which is a provable fact!

Plus, if the "pro" HHH windfarm people could just get intellectually honest, and accept the facts for what they are, they would see that this project is not feasible, and the lack of value/benefits don't merit any further consideration of it! Scout Energy is the main one who benefits from this at the expense of the entire public.

We need energy, and lots of it, if we want to be carbon free (which the experts doubt we can fully achieve); however, windfarms are NOT the answer. The correct answers exist but must be implemented to get us where we need to be.

I hope you and the EFSEC see and accept the truth that windfarms aren't the path we should be on. The EFSEC and Mr. Inslee do not have the right to ruin our lives and waste our money -yes, **our** money - on this and other windfarm projects!!

Regards,

Robert A Johnson

As a 25 year resident of Kennewick, WA, I fully support the Tri Cities CARES organization representing myself, my family and the citizens of Benton County, WA opposing the poorly sited and unwanted Horse Heaven Hills Wind and Solar Farm.

The Tri-Cities would be negatively impacted by the construction of such a large scale solar & wind farm so close to so many residential homes as well as the negative impact on wildlife and migratory patterns of many bird species. I completely trust TCC to represent us as residents of the Tri-Cities in their continued efforts of opposition to this project.

I'm a homeowner in the Tri-Cities area (Richland) adjacent to the area under consideration for installation of a combination wind turbine and solar energy project. I strongly object to its siting in the proposed areas surrounding the Tri-Cities for the following reasons:

1. First and foremost these technologies will not provide energy beneficial to the Tri-Cities area.
2. Construction will create traffic in rural areas on roadways not designed for heavy equipment or high volume traffic, and will increase already unacceptable levels of traffic congestion on local roadways, feeder roads, and main arteries.
3. The components of the wind turbines are not recyclable and thereby violate the "green energy" concept.

4. The components of the wind turbines require chemical lubricants that will leak and contaminate the surrounding soil.
5. The wind turbines are unsightly; they ruin the beautiful skyline/horizon, and the blinking red lights are distracting.
6. The wind turbines are noisy, which will significantly impact adjacent residential areas.
7. The wind turbines are dangerous to birds.

I am proud to be represented by Tricities Care in regards to the horrible Horse Heaven wind project. Wind and solar represent less than 1% of the total supply in our area. It is not a constant source of electricity and is an environmental nightmare. Plus the windmills destroy the landscape. Between hydroelectric and nuclear at over 80% of the total supply in our area with no CO2 emissions how could you even consider installing inefficient windmills and solar panels. We are truly blessed to have hydro and nuclear. Install these eyesores in Seattle and Portland not in our backyard.

Mike
