I support the Horse Heaven Clean Energy Center because it is a step towards the carbon-free energy future we need to combat climate change while meeting the increasing energy needs of Washingtonians. Our state can and should be a national leader on clean energy development! We passed the Clean Energy Transformation Act with the goal of removing ourselves from fossil-fuel reliance. A big part of meeting that state goal is getting new, renewable energy resources online as in time to avoid energy shortages. Horse Heaven Clean Energy Center will add up to 1,100 MW of renewable energy to our grid along with battery storage to help address intermittent conditions. Horse Heaven Clean Energy Center is not the first solar or wind project that the state has greenlit, nor should it be the last. But, today, it is a critical step in the right direction for Washington to responsibly transition our remaining fossil fuel dependent energy sources to renewable energy, curbing emissions and meeting the needs of our communities. I strongly urge EFSEC to support this project and move it forward.
Faye Peairs - 21828 SE 424th St. 98022

Fact Sheet, Required Permits, Approvals, and Licenses states "EFSEC's Site Certification Agreement (SCA) preempts otherwise applicable state and local regulatory permits pursuant to RCW 80.50.110 and RCW 80.50.120." Does this mean that every permit or approval on the list in Table 1.1-1 is thrown out? I'm particularly interested in the one about Oversize and Overweight Permits because disregarding this could constitute a serious safety hazard and could result in serious injury. Given the extraordinary weight of the nacelles (71+ tons) and towers (54+ tons), multiplied by 150 or 244, unacceptable stress will be put on the Benton County roads which are paid for and maintained through local property taxes. Is EFSEC accepting responsibility for injury and damage claims? If not, who is? Certainly not Benton County since they had no say in the matter.

I am writing to urge EFSEC to move the Horse Heaven Clean Energy Center project forward. Our state needs new renewable energy facilities to cut our emissions and combat climate change on pace with fossil plant retirement. Without added capacity of additional renewable energy, Washington can't meet its Clean Energy Transformation Act goals of becoming coal-fuel free by 2025 and fully renewable by 2045. 2025 is 2 years away! We need to make sure that Washington has the resources it needs to power our communities as we remove coal from our energy mix. Horse Heaven Clean Energy Center will produce up to 1,100 MW of renewable energy to support this need. Getting solar and wind energy online quickly, and responsibly, is critical to the health of our communities. Suyeko Kato - 5715 S. 144th St. 98168

This letter is to inform EFSEC of my support for the Horse Heaven Clean Energy Center. This project would play a key role in helping us meet our state's goal to diminish our reliance on fossil fuels and make a transition to renewable, carbon-free energy. Washington is home to some of the country's leading solar, wind, and hydroelectric facilities. And we should not stop there—I strongly believe this project will act as a pivotal step to achieve our aggressive carbon reduction targets by expanding our clean energy production. Washington has taken an important step forward in the fight against greenhouse gas emissions by passing the Clean Energy Transformation Act. But the challenge ahead is significant. To achieve the objective of phasing out coal-fired power plants, it is our responsibility to respond to the urgency of the climate crisis in the short time we have left. The Horse Heaven Clean Energy Center project can help Washington secure a greener future. I appreciate the opportunity to share my support for the Horse Heaven Clean Energy Center. Laurie Skipworth - 4503D 216th Sreet SW, 98043

Washington is home to some of the country's leading solar, wind, and hydroelectric facilities. And we should not stop there—I strongly believe this project will act as a pivotal step to achieve our aggressive carbon reduction targets by expanding our clean energy production. Washington has taken an important step forward in the fight against greenhouse gas emissions by passing the Clean Energy Transformation Act. But the challenge ahead is significant. To achieve the objective of phasing out coal-fired power plants, it is our responsibility to respond to the urgency of the climate crisis in the short time we have left. The Horse Heaven Clean Energy Center project can help Washington secure a greener future. I appreciate the opportunity to share my support for the Horse Heaven Clean Energy Center. Linda Williams Jones - 1011 Marine Drive NE, 98271

I am pleased to submit this letter to share my support for the Horse Heaven Clean Energy Center. The climate crisis is the defining challenge of our time, and it is imperative that we take action to mitigate its impacts. The Horse Heaven Clean Energy Center would be a crucial step in that direction. If approved, the project will help Washington meet its goals for reducing greenhouse gas emissions and move closer to becoming a carbon-neutral state by 2045. By investing in these large-scale clean energy projects, we can ensure that we meet the increasing energy demands in Washington with renewable sources. This project will have a combination of wind, solar, and battery storage components that will provide long-term energy viability. In addition to reducing carbon emissions, the Horse Heaven Clean Energy Center will also create jobs. The project is estimated to create over 900 construction jobs and 56 full-time jobs once operational. These are good-paying jobs that will have a positive economic impact on the communities in the Tri-Cities region. Once the project is completed, it will also generate millions in public revenue that could fund public safety and education. Washington has a responsibility to do its part by setting an aggressive timeline for retiring fossil fuel-powered plants, as well as permitting replacement power resources in a timely manner. The Horse Heaven Clean Energy Center will deliver substantial job growth and local economic development while reducing our state's reliance on fossil fuels and set us on a path to a cleaner, healthier future for all. I encourage you to consider these comments. Thank you for your time. Barbara C. Black - 2803 Borst Ave #6, 98531

Given the statement on the Fact Sheet and in Chapter 1, pg. 1-7, "For facilities under its jurisdiction, EFSEC's governing statutes and rules preempt all aspects of the certification and regulation of energy facilities approved under RCW 80.50. As a result, state and local regulatory permits, requirements, and standards may not apply to the proposed Project. Table 1-1 lists the generally applicable state and local permits and approvals that would apply if the Project were not under EFSEC's jurisdiction." Does this mean that every WAC, RCW, CWA, and BCC as they relate to this project can be ignored?

I support the Horse Heaven Clean Energy Center because I support a greener and cleaner future for Washington State. A large-scale clean energy project like the Horse Heaven Clean Energy Center will help Washington reach a carbon-free future and even position our state as a leader for renewable energy. By greenlighting projects like this, Washington can be a change leader, both regionally and nationally, with home-grown power supply solutions. This project will not just help the state as a whole – it will also benefit the local economy by providing over 900 construction jobs and 56 full-time jobs, while generating tax revenue to support public services for the Tri-Cities community. I write you to express my wholehearted support for this project because the benefits, locally and globally, are what we need to sustain a greener future. The state has a responsibility to foster positive environmental impacts, and the Horse Heaven Clean Energy Center can be a key step to making a real difference for the climate. Thank you for considering a greener, cleaner future. Nathan Rockwell - 5720 East Mckinley Avenue, 98404

I support the Horse Heaven Clean Energy Center because it is a step towards the carbon-free energy future we need to combat climate change while meeting the increasing energy needs of Washingtonians. Our state can and should be a national leader on clean energy development! We passed the Clean Energy Transformation Act with the goal of removing ourselves from fossil-fuel reliance. A big part of meeting that state goal is getting new, renewable energy resources online as in time to avoid energy shortages. Horse Heaven Clean Energy Center will add up to 1,100 MW of renewable energy to our grid along with battery storage to help address intermittent conditions. Horse Heaven Clean Energy Center is not the first solar or wind project that the state has greenlit, nor should it be the last. But, today, it is a critical step in the right direction for Washington to responsibly transition our remaining fossil fuel dependent energy sources to renewable energy, curbing emissions and meeting the needs of our communities. I strongly urge EFSEC to support this project and move it forward.

By greenlighting projects like this, Washington can be a change leader, both regionally and nationally, with home-grown power supply solutions. This project will not just help the state as a whole – it will also benefit the local economy by providing over 900 construction jobs and 56 full-time jobs, while generating tax revenue to support public services for the Tri-Cities community. I write you to express my wholehearted support for this project because the benefits, locally and globally, are what we need to sustain a greener future. The state has a responsibility to foster positive environmental impacts, and the Horse Heaven Clean Energy Center can be a key step to making a real difference for the climate. Thank you for considering a greener, cleaner future. Marleigh Flanigan - 908 East Calkins Drive, 99208

I support the Horse Heaven Clean Energy Center because I support a greener and cleaner future for Washington State. A large-scale clean energy project like the Horse Heaven Clean Energy Center will help Washington reach a carbon-free future and even position our state as a leader for renewable energy. By greenlighting projects like this, Washington can be a change leader, both regionally and nationally, with home-grown power supply solutions. This project will not just help the state as a whole – it will also benefit the local economy by providing over 900 construction jobs and 56 full-time jobs, while generating tax revenue to support public services for the Tri-Cities community. I write you to express my wholehearted support for this project because the benefits, locally and globally, are what we need to sustain a greener future. The state has a responsibility to foster positive environmental impacts, and the Horse Heaven Clean Energy Center can be a key step to making a real difference for the climate. Thank you for considering a greener, cleaner future. Terri Currie - 1004 Commercial Avenue #213, 98221

Sec. ES-2.1, pg. ES-1, states that "at it's closest point, the Project would be located approximately 4 miles south/southwest of the City of Kennewick and the larger Tri-Cities urban area." This statement is false because: Using the scale provided by Scout, a review of Figure ES-1 clearly shows that the closest point to the Kennewick City limit is 2.5 miles on the east side of I-82/H-395, <2.5 miles on the west side, and 1.25 at the Benton City limit. Significant populations exist between these city limits and the project boundary. The applicant needs to revisit and correct this error.

Sec. ES-3.2.1 Special Studies, pg. ES-7, refers to Appendix 4.10-1 which supposedly focuses on "potential visual impacts resulting from modification of the landscape and the response of viewers to those features." It also states "Information and conclusions presented in the special study focused on the introduction of the Proposed Action into the setting and characterization of long-term modifications to the existing landscape's form, line, color, and texture (SWCA 2022)." I object to this because: I did not find a reference in the Executive Summary, Acronyms and Abbreviations, that refers to this. Lots of internet references to Star Wars but that's probably not it. The referenced Table 4.10-1 analyzes glare inputs and assumptions and nothing else. There is much more to visual impact than that (i.e., a forest of turbines destroying the landscape's form, line color, and texture, and flashing red lights all night long).

To whom it may concern: I oppose the HH Hills project as proposed. The project polluted our landscape with inefficient wind turbines that only benefit a few financially. The power produced will not benefit the Tri-Cities community and provides little in terms of long term employment or benefit to the community and businesses. Of course this is all well known, but seemingly ignored. Long story short our community pays the price while a few prosper. Please deny the request and keep our scenic natural beauty as is. If large community like Seattle and LA want wind power then they can install the windmills in their own towns & cities. Thank you. Kevin Cochrane E. 297th Kennewick WA

This letter is to inform EFSEC of my support for the Horse Heaven Clean Energy Center. This project would play a key role in helping us meet our state's goal to diminish our reliance on fossil fuels and make a transition to renewable, carbon-free energy. Washington is home to some of the country's leading solar, wind, and hydroelectric facilities. And we should not stop there—I strongly believe this project will act as a pivotal step to achieve our aggressive carbon reduction targets by expanding our clean energy production. Washington has taken an important step forward in the fight against greenhouse gas emissions by passing the Clean Energy Transformation Act. But the challenge ahead is significant. To achieve the objective of phasing out coal-fired power plants, it is our responsibility to respond to the urgency of the climate crisis in the short time we have left. The Horse Heaven Clean Energy Center project can help Washington secure a greener future. I appreciate the opportunity to share my support for the Horse Heaven Clean Energy Center. Gary Barckley - 2640 Martin Way E, 98506

I am writing to express my support for the Horse Heaven Clean Energy Center and the role it will play in helping Washington achieve the ambitious decarbonization goals we set for ourselves with the passage of the Clean Energy Transformation Act (CETA) in 2019. I believe strongly in impact mitigation and value EFSEC's process, but know that Washington's ability to realize a carbon-free future will depend on permitting large-scale clean energy projects in a timely manner just like the Horse Heaven Clean Energy Center. This is a good project with appropriately identified mitigation measures, and backed by an experienced team that will produce up to 1,150 MW of renewable energy through a combination of wind, solar, and battery storage technology. With the passage of CETA, Washington established itself as a leader in the fight to curb global emissions. The state now has a responsibility to ensure the clean energy transition can be achieved in the necessary timeframe to facilitate fossil plant retirement, and in doing we can set an example for the rest of the nation to follow. Thank you for your consideration. Harriett Quintana - 415 North L Street, 98520

I support the Horse Heaven Clean Energy Center because I support a greener and cleaner future for Washington State. A large-scale clean energy project like the Horse Heaven Clean Energy Center will help Washington reach a carbon-free future and even position our state as a leader for renewable energy. By greenlighting projects like this, Washington can be a change leader, both regionally and nationally, with home-grown power supply solutions. This project will not just help the state as a whole – it will also benefit the local economy by providing over 900 construction jobs and 56 full-time jobs, while generating tax revenue to support public services for the Tri-Cities community. I write you to express my wholehearted support for this project because the benefits, locally and globally, are what we need to sustain a greener future. The state has a responsibility to foster positive environmental impacts, and the Horse Heaven Clean Energy Center can be a key step to making a real difference for the climate. Thank you for considering a greener, cleaner future. Barbara Painter-Wondra - 2024 Tibbetts Dr Apt 24, 98632

I am writing to express my support for the Horse Heaven Clean Energy Center because I believe that it would be a strong and reliable source of renewable power for Washington State. With the passage of the Clean Energy Transformation Act (CETA) in 2019, Washington has made a commitment to reach a 100% clean electricity supply. Projects like the Horse Heaven Clean Energy Center that boast wind, solar, and battery storage capabilities will be necessary investments to reach those CETA goals. The Horse Heaven Clean Energy Center will help Washington set an example for the rest of the nation to follow. Washington residents know that our summers are getting progressively hotter, extreme weather events are becoming more common, and forest fires are creeping into the fall months. Many dismiss this change as 'the new normal'. But this is far from Washington's normal. We must take proactive steps to protect this remarkable place we call home. Washington needs a large-scale clean energy resource to promote a greener future and head off the disastrous effects of climate change. I strongly value the ability to voice my support for these important projects, and I ask you to please consider my comment in making your decision. Jennifer Larsen - 1818 23rd Ave Unit C, 98122

This letter is to inform EFSEC of my support for the Horse Heaven Clean Energy Center. This project would play a key role in helping us meet our state's goal to diminish our reliance on fossil fuels and make a transition to renewable, carbon-free energy. Washington is home to some of the country's leading solar, wind, and hydroelectric facilities. And we should not stop there—I strongly believe this project will act as a pivotal step to achieve our aggressive carbon reduction targets by expanding our clean energy production. Washington has taken an important step forward in the fight against greenhouse gas emissions by passing the Clean Energy Transformation Act. But the challenge ahead is significant. To achieve the objective of phasing out coal-fired power plants, it is our responsibility to respond to the urgency of the climate crisis in the short time we have left. The Horse Heaven Clean Energy Center project can help Washington secure a greener future. I appreciate the opportunity to share my support for the Horse Heaven Clean Energy Center. April Faires - 2305 34th Ave SW, 98374

I am writing to express my support for the Horse Heaven Clean Energy Center and the role it will play in helping Washington achieve the ambitious decarbonization goals we set for ourselves with the passage of the Clean Energy Transformation Act (CETA) in 2019. I believe strongly in impact mitigation and value EFSEC's process, but know that Washington's ability to realize a carbon-free future will depend on permitting large-scale clean energy projects in a timely manner just like the Horse Heaven Clean Energy Center. This is a good project with appropriately identified mitigation measures, and backed by an experienced team that will produce up to 1,150 MW of renewable energy through a combination of wind, solar, and battery storage technology. With the passage of CETA, Washington established itself as a leader in the fight to curb global emissions. The state now has a responsibility to ensure the clean energy transition can be achieved in the necessary timeframe to facilitate fossil plant retirement, and in doing we can set an example for the rest of the nation to follow. Thank you for your consideration. Bonnie Backus - 2020 Baker, 83708

Washington has taken an important step forward in the fight against greenhouse gas emissions by passing the Clean Energy Transformation Act. But the challenge ahead is significant. To achieve the objective of phasing out coal-fired power plants, it is our responsibility to respond to the urgency of the climate crisis in the short time we have left. The Horse Heaven Clean Energy Center project can help Washington secure a greener future. I appreciate the opportunity to share my support for the Horse Heaven Clean Energy Center. Antwain Kelly - 115 129th street south, 98444

This letter is to inform EFSEC of my support for the Horse Heaven Clean Energy Center. This project would play a key role in helping us meet our state's goal to diminish our reliance on fossil fuels and make a transition to renewable, carbon-free energy. Washington is home to some of the country's leading solar, wind, and hydroelectric facilities. And we should not stop there—I strongly believe this project will act as a pivotal step to achieve our aggressive carbon reduction targets by expanding our clean energy production. Washington has taken an important step forward in the fight against greenhouse gas emissions by passing the Clean Energy Transformation Act. But the challenge ahead is significant. To achieve the objective of phasing out coal-fired power plants, it is our responsibility to respond to the urgency of the climate crisis in the short time we have left. The Horse Heaven Clean Energy Center project can help Washington secure a greener future. I appreciate the opportunity to share my support for the Horse Heaven Clean Energy Center. April Fleming - PO Box 2131, 98360

I am pleased to submit this letter to share my support for the Horse Heaven Clean Energy Center. The climate crisis is the defining challenge of our time, and it is imperative that we take action to mitigate its impacts. The Horse Heaven Clean Energy Center would be a crucial step in that direction. If approved, the project will help Washington meet its goals for reducing greenhouse gas emissions and move closer to becoming a carbon-neutral state by 2045. By investing in these large-scale clean energy projects, we can ensure that we meet the increasing energy demands in Washington with renewable sources. This project will have a combination of wind, solar, and battery storage components that will provide long-term energy viability. In addition to reducing carbon emissions, the Horse Heaven Clean Energy Center will also create jobs. The project is estimated to create over 900 construction jobs and 56 full-time jobs once operational. These are good-paying jobs that will have a positive economic impact on the communities in the Tri-Cities region. Once the project is completed, it will also generate millions in public revenue that could fund public safety and education. Washington has a responsibility to do its part by setting an aggressive timeline for retiring fossil fuel-powered plants, as well as permitting replacement power resources in a timely manner. The Horse Heaven Clean Energy Center will deliver substantial job growth and local economic development while reducing our state's reliance on fossil fuels and set us on a path to a cleaner, healthier future for all. I encourage you to consider these comments. Thank you for your time. Stacy Parker - 610 North Pine Street Apt 5, 98926

It is more important now than ever to make the drastic changes the natural world needs in order for any life including humans to survive and thrive, but the negligence of the worlds governments allowing the earth's resources and environment to be exploited by oil companies and plastic producers and commercial fishing for the past 100 years has left our livelihood in serious crisis. I as a resident of Washington state feel that our state needs to lead the way for the rest of the country. And yes I want greener energy, and love the idea of solar power for our primary source of energy. I do not agree with leaving the snake River damns up though. I want to make that clear. I love wildlife more than anything and the southern resident orcas are literally starving to death due to a lack of salmon. Just in 2018 a mother southern resident orca varied her dead baby through the water for 17 days and over 1000 miles and to me that was a scream for help and we humans have the power to help if leaders would just make the right choices. She was showing the world that they are dying and that it's our fault but we can help. So the damns need to go, but if leaders make strategic decisions we can have both. A better cleaner world for us and for all wildlife. We need the natural environment and all other living beings on this planet. So please make smart decisions for all not just humans. It breaks my heart how much wildlife and the natural world has suffered and sacrificed due to human's greed and negligence. and in the end we depend on all ecosystems and we are on the verge of seeing catastrophic impacts to these very ecosystems we depend on. Thank you Miss Crystal Lynn Fisher

I am concerned about accuracy and integrity with carbon footprint calculations of alternative energy sources. In 2017, the rural community of Newport, WA in Pend Oreille County was threatened with the possibility of a coal-burning silicon smelter being located in our rural area and within a mile from Newport schools and downtown Newport. The PacWest/HiTest silicon smelter claimed that 50% of their product would be for solar panels, and that their smelter would be a "Green" facility. They later back-tracked and stated that only 5% of their product would be for solar panels. The smelter would emit 766,000 tons of GHGs per year (plus tens to hundreds of tons of other coal toxins per year). I began an investigation into silicon smelting impacts on solar panel carbon footprints, and what I have found is very disturbing. I found that the silicon smelting process is NOT included in silicon solar panel carbon footprints, and that the LCI/LCA process for determining carbon footprints is highly subjective, and gives inconsistent and non-comparable results. Please read my guest opinion "Silicon Smelting Process Tarnishes "Green" Solar Panels" in the April 5, 2022 Spokesman Review Newspaper, and my pre-print paper: "The Impact of Silicon Smelting on Crystal Silicon Solar Panel Carbon Footprints" on ResearchGate. I am very concerned about climate change, but what I have found regarding silicon solar panels and carbon footprint calculations tells me that there is corruption in some alternative energy claims; and until this is fixed, we will continue to exacerbate the impacts of climate change. Thank you, John M. Endres jmmendres@tds.net

The Horse Heaven Hills Solar and Wind project will provide hundreds of millions of dollars for our local economy and over 900 jobs for the working people who build and maintain our community. Additionally, with the winters getting colder, the summers getting hotter, and fires becoming an entire season we need all the local power generation we can get.

I am a union electrician living in the Tri Cities and working in the Tri Cities and surrounding areas. I fully support this installation, for the good, high paying skilled labor jobs it will require for construction, as well as the property tax offset it provides for local citizens, and the continuation of our progress to eliminate the need for energy produced from fossil fuels.

I support the Horse Heaven Clean Energy Center because I support a greener and cleaner future for Washington State. A large-scale clean energy project like the Horse Heaven Clean Energy Center will help Washington reach a carbon-free future and even position our state as a leader for renewable energy. By greenlighting projects like this, Washington can be a change leader, both regionally and nationally, with home-grown power supply solutions. This project will not just help the state as a whole – it will also benefit the local economy by providing over 900 construction jobs and 56 full-time jobs, while generating tax revenue to support public services for the Tri-Cities community. I write you to express my wholehearted support for this project because the benefits, locally and globally, are what we need to sustain a greener future. The state has a responsibility to foster positive environmental impacts, and the Horse Heaven Clean Energy Center can be a key step to making a real difference for the climate. Thank you for considering a greener, cleaner future. Alison Anderson - 600 Black Lake Blvd Apt 66 Olympia, WA, 98502

I am pleased to submit this letter to share my support for the Horse Heaven Clean Energy Center. The climate crisis is the defining challenge of our time, and it is imperative that we take action to mitigate its impacts. The Horse Heaven Clean Energy Center would be a crucial step in that direction. If approved, the project will help Washington meet its goals for reducing greenhouse gas emissions and move closer to becoming a carbon-neutral state by 2045. By investing in these large-scale clean energy projects, we can ensure that we meet the increasing energy demands in Washington with renewable sources. This project will have a combination of wind, solar, and battery storage components that will provide long-term energy viability. In addition to reducing carbon emissions, the Horse Heaven Clean Energy Center will also create jobs. The project is estimated to create over 900 construction jobs and 56 full-time jobs once operational. These are good-paying jobs that will have a positive economic impact on the communities in the Tri-Cities region. Once the project is completed, it will also generate millions in public revenue that could fund public safety and education. Washington has a responsibility to do its part by setting an aggressive timeline for retiring fossil fuel-powered plants, as well as permitting replacement power resources in a timely manner. The Horse Heaven Clean Energy Center will deliver substantial job growth and local economic development while reducing our state's reliance on fossil fuels and set us on a path to a cleaner, healthier future for all. I encourage you to consider these comments. Thank you for your time. Marilyn Kimmerling - 4414 n 34th st, 98407

I am pleased to submit this letter to share my support for the Horse Heaven Clean Energy Center. The climate crisis is the defining challenge of our time, and it is imperative that we take action to mitigate its impacts. The Horse Heaven Clean Energy Center would be a crucial step in that direction. If approved, the project will help Washington meet its goals for reducing greenhouse gas emissions and move closer to becoming a carbon-neutral state by 2045. By investing in these large-scale clean energy projects, we can ensure that we meet the increasing energy demands in Washington with renewable sources. This project will have a combination of wind, solar, and battery storage components that will provide long-term energy viability. In addition to reducing carbon emissions, the Horse Heaven Clean Energy Center will also create jobs. The project is estimated to create over 900 construction jobs and 56 full-time jobs once operational. These are good-paying jobs that will have a positive economic impact on the communities in the Tri-Cities region. Once the project is completed, it will also generate millions in public revenue that could fund public safety and education. Washington has a responsibility to do its part by setting an aggressive timeline for retiring fossil fuel-powered plants, as well as permitting replacement power resources in a timely manner. The Horse Heaven Clean Energy Center will deliver substantial job growth and local economic development while reducing our state's reliance on fossil fuels and set us on a path to a cleaner, healthier future for all. I encourage you to consider these comments. Thank you for your time. Kathy Sharley - 2882 Sun Mountain Drive, 98022

This letter is to inform EFSEC of my support for the Horse Heaven Clean Energy Center. This project would play a key role in helping us meet our state's goal to diminish our reliance on fossil fuels and make a transition to renewable, carbon-free energy. Washington is home to some of the country's leading solar, wind, and hydroelectric facilities. And we should not stop there—I strongly believe this project will act as a pivotal step to achieve our aggressive carbon reduction targets by expanding our clean energy production. Washington has taken an important step forward in the fight against greenhouse gas emissions by passing the Clean Energy Transformation Act. But the challenge ahead is significant. To achieve the objective of phasing out coal-fired power plants, it is our responsibility to respond to the urgency of the climate crisis in the short time we have left. The Horse Heaven Clean Energy Center project can help Washington secure a greener future. I appreciate the opportunity to share my support for the Horse Heaven Clean Energy Center. Ivory Makanani - 3520 156th St SW D2, 98087

I am writing to express my support for the Horse Heaven Clean Energy Center because I believe that it would be a strong and reliable source of renewable power for Washington State. With the passage of the Clean Energy Transformation Act (CETA) in 2019, Washington has made a commitment to reach a 100% clean electricity supply. Projects like the Horse Heaven Clean Energy Center that boast wind, solar, and battery storage capabilities will be necessary investments to reach those CETA goals. The Horse Heaven Clean Energy Center will help Washington set an example for the rest of the nation to follow. Washington residents know that our summers are getting progressively hotter, extreme weather events are becoming more common, and forest fires are creeping into the fall months. Many dismiss this change as 'the new normal'. But this is far from Washington's normal. We must take proactive steps to protect this remarkable place we call home. Washington needs a large-scale clean energy resource to promote a greener future and head off the disastrous effects of climate change. I strongly value the ability to voice my support for these important projects, and I ask you to please consider my comment in making your decision. Crystal Ward - 914 75th. St. E. #C, 98404
