External Email I am writing to express my support for the Horse Heaven Clean Energy Center and the role it will play in helping Washington achieve the ambitious decarbonization goals we set for ourselves with the passage of the Clean Energy Transformation Act (CETA) in 2019. I believe strongly in impact mitigation and value EFSEC's process, but know that Washington's ability to realize a carbon-free future will depend on permitting large-scale clean energy projects in a timely manner just like the Horse Heaven Clean Energy Center. This is a good project with appropriately identified mitigation measures, and backed by an experienced team that will produce up to 1,150 MW of renewable energy through a combination of wind, solar, and battery storage technology. With the passage of CETA, Washington established itself as a leader in the fight to curb global emissions. The state now has a responsibility to ensure the clean energy transition can be achieved in the necessary timeframe to facilitate fossil plant retirement, and in doing we can set an example for the rest of the nation to follow. Thank you for your consideration. Chris Covert-Bowlds 523 N 84th St, Seattle, WA 98103 c.covertbowlds@gmail.com 206-883-8989

External Email I am writing to express my support for the Horse Heaven Clean Energy Center and the role it will play in helping Washington achieve the ambitious decarbonization goals we set for ourselves with the passage of the Clean Energy Transformation Act (CETA) in 2019. I believe strongly in impact mitigation and value EFSEC's process, but know that Washington's ability to realize a carbon-free future will depend on permitting large-scale clean energy projects in a timely manner just like the Horse Heaven Clean Energy Center. This is a good project with appropriately identified mitigation measures, and backed by an experienced team that will produce up to 1,150 MW of renewable energy through a combination of wind, solar, and battery storage technology. With the passage of CETA, Washington established itself as a leader in the fight to curb global emissions. The state now has a responsibility to ensure the clean energy transition can be achieved in the necessary timeframe to facilitate fossil plant retirement, and in doing we can set an example for the rest of the nation to follow. Thank you for your consideration.

External Email I am writing to express my support for the Horse Heaven Clean Energy Center and the role it will play in helping Washington achieve the ambitious decarbonization goals we set for ourselves with the passage of the Clean Energy Transformation Act (CETA) in 2019. I believe strongly in impact mitigation and value EFSEC's process, but know that Washington's ability to realize a carbon-free future will depend on permitting large-scale clean energy projects in a timely manner just like the Horse Heaven Clean Energy Center. This is a good project with appropriately identified mitigation measures, and backed by an experienced team that will produce up to 1,150 MW of renewable energy through a combination of wind, solar, and battery storage technology. With the passage of CETA, Washington established itself as a leader in the fight to curb global emissions. The state now has a responsibility to ensure the clean energy transition can be achieved in the necessary timeframe to facilitate fossil plant retirement, and in doing we can set an example for the rest of the nation to follow. Thank you for your consideration. Dr. Richard J Frye Sent from my Galaxy

External Email I'm writing to request the public comment period for the Horse Heaven Hills Project be extended from January 31, 2023 at least two weeks to Feb 15, 2023. I am a resident of Kennewick WA and I live in the area that will be affected directly by the project. The DEIS is exceedingly large, the online version is not user friendly, and takes significant time to read and comment on. Two weeks will grant reviewers extra time to conduct a more thorough and conscientious review and comment. This will greatly enhance the quality of the work and results that can be achieved by EFSEC through the public commenting process. I would greatly appreciate knowing if this extension is feasible and can be granted forthwith. I believe that letting the public and the many interested parties and agencies know at the earliest possible time will greatly aid the process. Appreciatively, Paul Krupin, BA MS JD 2404 South Lyle St. Kennewick WA 99337 509-531-8390 cell 509-582-5174 landline Paul@Presari.com

External Email Letting a An Australian investor (motivated by our tax payers subsidy) that hired a Colorado based Company (Scout Energy) to erect 244 wind machines 671 feet high, this is a protected Lewis and Clark Heritage Trail along a ridge/canyon area. These are placed in the Pacific Flyway migration path, degrading the shrub steppe ecosystem. They will have red lights flashing day and night and the noise will be outrageous. This also is dessert and limited water which we pay highly for irrigation, we do not have water to spare. We are already being forced to have an expanded retention pond pushed into our land just for the farmers what more would we be required to pay for with these ugly monsters wasting gallons of our water daily. We have only 45 days to protest before Gov inslee pushes this Tax payer financed program down our throats. And ruins our community. This a residential area with nice homes, farms and vineyard's. This Australian company wants to ship this power out of state as it will be too costly for Kennewick residents to pay for but it will be destroying our land and using our restricted water and destroying our aquifers. This area is also the home of many large predator birds needed to keep the snake and rodent population under control as well as many endangered species who live here year around. .it is also a major bird migrating path and their environment will also be destroyed. <https://www.efsec.wa.gov/energy-facilities/horse-heaven-wind-project/horse-heaven-sepa> This is invasive will cause the land to be destroyed produce horrible air quality blowing dust around and forcing me to not be able to go outside. The dirt already can be restrictive but the construction will be unbearable. Also according to the Harvard study it will increase the temperature another 8*! That is outrageous! We had 110* some days last summer, you will destroy this land. How much more air condoning will we need! This is a Simulated view by developer off Badger Mountain looking over Dallas Road and Badger Canyon at HHH wind farm This area has only a 2 landed farm road allowing all of our residents to travel to exit the area or get farm equipment from one field to another the construction would impact our community negatively! We already are having to deal with KID's unwanted construction and the massive power line they are planning on constructing for them tearing up our community and costing taxpayer money in our area. Residents need to be addressed. This is very unreasonable, if you want this put it in a uninhabited area not a residential area! This Project is backed by Australian investors (motivated by our tax payers subsidy) that hired a Colorado based Company (Scout Energy) to erect 244 wind machines 671 feet tall for 24 miles on private wheat farms, protected Lewis and Clark Heritage Trail along a ridge/canyon area. These are placed in the Pacific Flyway migration path, degrading the shrub steppe ecosystem (federally protected birds and plants.) There is no energy/economic impact of this project other than the out of state user or large corporation that will benefit from purchasing a "green energy source" with transferable tax credits to another facility not meeting energy guidelines (no penalty.) Other states denied this project. Our local authorities and public were bypassed input and it was directly placed in Olympia! Negatively impacting our wine and agriculture, higher energy bills for consumers. Currently Europeans are rethinking this minimum producing wind turbine energy and beginning to dismantle them. European data points to health hazards including the environmental impact (Netherlands and Germany dismantling has begun). One of the Hawk pairs that lives in the tree at the intersection of Badger Rd and Badger Canyon Rd. There are many nests in our canyon this is only one. We also have other protected species living in our land. There has been no real impact statements produced locally only the investors who bypassed us. -- Becky Hughes Concerned citizen of Badger canyon Kennewick, WA 99338

Q1. First and last name	Pam Minelli
Q2. Email address	pam@tricityscare.org
Q3. Are you part of an Agency or Organization?	Yes (please specify) Secretary, TRI-CITIES C.A.R.E.S.
Q4. Share any comment	<p>External Email Dear Chair Drew and Director Bumpus: Due to the complexity and length of the DEIS for the HH Wind and Solar Project, we request an extension to the public comment period slated to end January 31, 2023. In addition, the current 45 day public comment period has included multiple holidays (4+) making it impossible for the public to access copies of the DEIS at local libraries or to contact EFSEC staff and local agencies for information or questions on those days. Please grant our request for an extension of the DESI public comment period. Up to 30 days more would allow for local participation/commenting on this important document. An in-person public comment meeting in the Tri-Cities is also needed. Commenting online or by USPS works for many, but not for all. To allow equitable opportunities for all locals to comment, a public comment meeting for the HH Wind Project DEIS is requested. (Like the one EFSEC offered for the Watoma Wind Project). Thank you in advance for your consideration of extending the DEIS public comment period up to 30 days beyond January 31, 2023 and for scheduling an in-person public comment meeting in the Tri-Cities. Respectfully, Pam Minelli -- Secretary, TRI-CITIES C.A.R.E.S. Phone: 509-539-6788 Email: pam@tricityscare.org TRI-CITIES C.A.R.E.S Community Action for Responsible Environmental Stewardship Visit: www.TriCitiesCARES.org</p>

External Email Subject: Horse Heaven Wind Farm Public Hearing Request This email is being sent to you as the lead agency to request a public hearing be held on the Horse Heaven Wind Farm project. According to the Washington State Environmental Policy Act Handbook (2018), "The lead agency is required to hold a public hearing if 50 or more local persons within the agency's jurisdiction or who would be adversely impacted by the proposal, make a written request within 30 days of the issue date of the draft EIS." I have a direct view of the Horse Heavens, as do a large number of residents of the Pasco and Franklin County areas, and my view, and ability to enjoy the solitude of serene vistas and evenings will be adversely affected by this project. Thank you, Robert M. Carosino 130 Terrace Drive Pasco, WA 99301 Sent from Outlook
