External Email I am writing to express my support for the Horse Heaven Clean Energy Center and the role it will play in helping Washington achieve the ambitious decarbonization goals we set for ourselves with the passage of the Clean Energy Transformation Act (CETA) in 2019. I believe strongly in impact mitigation and value EFSEC's process, but know that Washington's ability to realize a carbon-free future will depend on permitting large-scale clean energy projects in a timely manner just like the Horse Heaven Clean Energy Center. This is a good project with appropriately identified mitigation measures, and backed by an experienced team that will produce up to 1,150 MW of renewable energy through a combination of wind, solar, and battery storage technology. With the passage of CETA, Washington established itself as a leader in the fight to curb global emissions. The state now has a responsibility to ensure the clean energy transition can be achieved in the necessary timeframe to facilitate fossil plant retirement, and in doing we can set an example for the rest of the nation to follow. Thank you for your consideration. Sent from my iPhone David Christie

External Email This email is being sent to you as the lead agency to request a public hearing on the Horse Heaven Wind Farm project. According to the Washington State Environmental Policy Act Handbook 2018, "The lead agency is required to hold a public hearing if 50 or more local persons within the agency's jurisdiction or who would be adversely impacted by the proposal, make a written request within 30 days of the issue date of the draft EIS." Thank you, Markus Stauffer 9708 Schuman Lane Pasco, WA 99301 Begin forwarded message: From: PM Stauffer Subject: Public Hearing on the DEIS for the HH Wind Farm Project Date: January 15, 2023 at 5:15:20 PM PST To: sonia.bumpus@efsec.wa.gov Cc: Judy Dear Mrs. Bumpus, I would like to request that a public hearing is conducted on the DEIS for HH wind farm. This project will impact us all in the Tri-Cities in one way or another and it is important that we all understand the ramifications of this project. Thanks for your consideration. Markus Stauffer 9708 Schuman Lane Pasco, WA 99301 When the lead agency is also the proponent of the proposal, the time periods may be extended to whatever the lead agency thinks is appropriate. The lead agency is required to hold a public hearing if 50 or more persons, within the agency's jurisdiction or who would be adversely impacted by the proposal, make written request within 30 days of the issue date of the draft EIS. Lead agencies may also at their option provide this additional avenue and opportunity for agencies, tribes, and the public to comment on the document. The hearing must be held between 15 and 50 days after the draft EIS is issued, and a minimum of 10-day notice must be made. If held, this hearing does not constitute the one open- record hearing that is allowed under RCW 36.70B.020(3).

Q4. **Share any comment**

External Email I am writing a formal complaint on the attempted horse heaven wind farm project. This project will adversely affect my family in a negative way. The wind farm also affects TRI cities in a negative way and the negatives outweigh the benefits. I bought land at my location to be able to see the hawks fly in the badger canyon. The wind farm will decimate our hawk population. I bought my land for the beautiful rolling hills and the starry county night skies. The eye sores of a wind farm in my back yard will ruin the value of my most valuable asset which is my home. The bright blinking lights will be a nuisance and diminish my quality of life. Not to mention the noise, traffic, and dust that will affect my family's health and we'll being. I reject the proposal to put any wind farm in our back yard that will do nothing but make our lives worse. I am prepared to pursue any legal action to stop you from harming my family and those around me. Brett Turner Get Outlook for Android

External Email Download full resolution images Available until Feb 15, 2023 Attached is a video showing the ridges along the Tri-Cities. It shows the very small compared to the proposed Seattle Space Needle proposed windmills in the DEIS. These small windmills are in Finley. The ridges go from Finley to the Rattlesnake Mountain which overlooks the Hanford Nuclear Reservation. Rattlesnake Mountain has a huge natural preserve named ALE. On ALE there are tons of elk herds that roam free without a worry of being shot on the land. The newly reintroduced Proghorn Antelope also roam on ALE that the Yakama Indian Reservation worked with the Fish & Wildlife to bring back the species to Washington. Rattlesnake Mountain is the largest treeless mountain in the continental USA. These views make the area a majestic background to the mighty Columbia River. The views are priceless and can be seen all around the area. This video was taken in Columbia County, not Benton or Franklin counties in the Tri-Cities. The wine industry and local tourism industry banks on these views as well as the residents who have dedicated generations to supporting the nation by supporting the nuclear bomb development at Hanford. I am a third generation Hanford scientist. My grandparents on both sides moved to Hanford for a better opportunity for their families by supporting the top secret mission of Hanford. My Native American grandma taught me to love and respect the land. My degree in Environmental Science also taught me to make long term wise decisions for projecting the warth and I am proud to have worked on the Yucca Mountain Environmental Impact Statement for the nation. We have all given a lot to the nation in our local area in the Tri-Cities. The ultimate sacrifice is lives lost due to radiation exposure such as my uncle. We deserve to have ridges that are beautiful to give us peace. We have the Hanford reservation that can support small modular nuclear reactors all along the Columbia on land that is already contaminated from Hanford. These reactors provide the most energy humans can possibly produce. They take up a tiny amount of land. It is just wise versus taking up a bunch of land with things that produce toxins to build, to operate and can't be recycled and do not pay for themselves in their life and have to wait for wind or sun to produce energy. Attached is a picture of the beautiful Rattlesnake Mountain and the Yakima River (one of three main rivers that support an abundance of wildlife in our beautiful Shrub-steppe arid area that we call home). External Email To whom this may concern Please listen to the public opinion and owners of this beautiful land you want to destroy. We Tri Citians don't want this Solar project to transpire, we say no! We want, we have the right to look out into the horizon and see our God given Sky we have the right to our natural beauty, our land, our view. It belongs to us, not a our Governor, nor a Bullheaded solar-power company. Don't come here with false hood about green energy, we know this is false. Refer to Sharyl Attkisson: Is "Green" really clean. These also will be obsolete very soon and you will walk away laughing all the way to the bank leaving us with the eyesore. We feel we are not ready to allow such a drastic forever project that would impact our Community and our Beautiful Columbia Basin. We are not on board with those making this permanent decision. There are better out of the way hills to go to. We have done enough on our part as you can see anywhere you go. Driving into Tri Cities from Walla Walla, Turbines everywhere. ENOUGH!! Enough is enough! You have failed to show the benefits other than buying out politicians you have failed to provide alternatives, like the Tulip flower design and others. We want you and many companies to stay away from rural farm Land and population. We take it seriously when you kill our wildlife foul And is this possibly a culprit in aviation bird flu virus with carcasses piling up at base. NO NO NO! Just No! Seriously, Sonia Ayala 700 rd. 32 Pasco, wa 99301

External Email This email is being sent to you as the lead agency to request a public hearing on the Horse Heaven Wind Farm project. According to the Washington State Environmental Policy Act Handbook 2018, "The lead agency is required to hold a public hearing if 50 or more local persons within the agency's jurisdiction or who would be adversely impacted by the proposal, make a written request within 30 days of the issue date of the draft EIS." I am in opposition of the Horse Heaven Wind Farm. In Benton County, we already have the ability to harness energy through nuclear and hydroelectric power. In this area, harnessing a mere 27% of wind power is not a significant amount of energy considering all of the documented negative impacts the turbines may have to our local environment. It is proven that wind turbines have a negative effect on animals and human health, along with creating an undesirable visual landscape. The cost to develop a local windfarm does not appear to be cost efficient when we have two other sources of energy currently in our backyard. Thank you, Rod Spaniel 76103 Canyon Meadow Drive Kennewick, WA 99338

External Email I'm sending you this email because WA state Environmental Policy Act Handbook 2018 says, "The lead agency is required to hold a public hearing if 50 or more local persons within the agency's jurisdiction or who would be adversely impacted by the proposal, make a written request within 30 days of the issue date of the draft EIS." I don't want to see a wind farm on the Horse Heaven Hills. We go there regularly for the view. Sometimes, though, McBee road is closed due to nesting birds of prey. These would be adversely impacted by turbines. It kills me—this is supposedly a green, think of the planet move, but if we want to think of the planet, we won't threaten the bats and birds with these ugly unnecessary landscape features. We are so blessed to have all our wonderful hydropower. Thank you, Elizabeth Swanson

External Email Dear EFSEC: Horse Heaven Wind Farm Public Hearing Request This email is being sent to you as the lead agency to request a public hearing on the Horse Heaven Wind Farm project. According to the Washington State Environmental Policy Act Handbook 2018, "The lead agency is required to hold a public hearing if 50 or more local persons within the agency's jurisdiction or who would be adversely impacted by the proposal, make a written request within 30 days of the issue date of the draft EIS." The mere thought of all those mega tall space needle sized ugly windmills that will only generate electricity 40% of the time and often in spring and fall when we don't need it and their red light district flashing all night, every night of the 365 nights of the year would be an impact that is not currently considered. I can already see on my eastern horizon hundreds of those flashing red lights in western Walla Walla county on the 9 mile Windmill farm and if scum bag Scout jams these down our throat to see them to the western horizon as well on the unspoiled Horse Heaven Hills would be worse yet. Thank you, Michael Scrimsher 104 Tuttle Lane Burbank WA 99323 Michael Scrimsher Manager, Uranium, U Recovery and Cylinders O = 509-375-8238 C = 509-392-9722 Michael.Scrimsher@framatome.com Blessed are those who can give without remembering and receive without forgetting.

Q4. **Share any comment**

External Email As required by the Washington State Environmental Policy Act Handbook 2018: The lead agency is required to hold a public hearing if 50 or more local personal within the agency's jurisdiction or who would be adversely impacted by the proposal, make a written request within 30 days of the issue date of the draft EIS. If this email does not suffice as a "written request" then please promptly inform me and others that have emailed of the proper address to direct a formally written and signed request. Jerrod Sessler 84009 West Old Inland Empire Highway Prosser, WA 99350 The proposed Horse Heaven Wind Farm project is problematic in several ways. The first and most importantly is that it is a collaboration of private and public organizations that do not uniquely have the authority to acquire and use the land for a for-profit venture under the 5th Amendment of the US Constitution or under any other section of the state or federal Constitutions. Furthermore, there is no demonstration that the resulting energy generation is needed to support the demands of Washington residents. If it is needed for Oregon or California residents then it would be questionable why a prized portion of our landscape, not to mention the environmental concerns would be sacrificed for such a project. The overall environmental impact of wind energy generation has not been thoroughly researched and proven to be resilient without the subsidization as a result of political persuasion which creates an unfair and unreasonable imbalance economically for all other forms of energy. There are other factors that must be studied and considered in a non-partisan way prior to making any decisions as to how to proceed or even if a project such as this should be allowed. Let's say YES to America, together! Jerrod Jerrod Sessler Congressional Candidate [about.me/jsessler](https://www.about.me/jsessler)

External Email We need a hearing A other complaint is they have not done adverse testing on each proposed wind turbine, they have not even given exact location of each turbine. We need testing as to the affects on people health, noise studies or killing wild birds, animals and environment! Lights, noise and killing protected animals! Latest is the deaths of Whales off the east coast! Here it is not only flashing lights increased land temperature, pollution of the land as each unit requires 80 gallons of oil to be changed out every 3 months that is known to leak into the soil, massive water needs. The fact that the fiberglass blades are not recyclable and massive blades have to be buried in landfills. Each unit only lasts 20 yrs and costs almost 1 million dollars to replace. New infrastructure has to be laid to transport this massively expensive power to where it is needed.

Q4. **Share any comment**

External Email This email is being sent to you as the lead agency to request a public hearing on the Horse Heaven Wind Farm project. According to the Washington State Environmental Policy Act Handbook 2018, "The lead agency is required to hold a public hearing if 50 or more local persons within the agency's jurisdiction or who would be adversely impacted by the proposal, make a written request within 30 days of the issue date of the draft EIS." As a Benton County land owner, I feel I would be adversely impacted by the proposed wind farm. My concerns are for the raptor flyway, visual pollution to me and my neighbors (eyesore), and no explicit benefit for my community. The blades are not recyclable and my fear is, if erected, they will be abandoned in place. Please examine whether a solar panel farm would be a less impacting method of power production. Thank you, Jeanne Peterson 57311 N. 435 PR NE Benton City WA 99320
