Re: Final Application for Site Certification, Horse Heaven Wind Farm Project

Dear Kathleen:

Horse Heaven Wind Farm, LLC (Applicant) is pleased to submit this Final Application for Site Certification (ASC) for the Horse Heaven Wind Farm (Project) to the Washington Energy Facility Site Evaluation Council (EFSEC). Our original application, submitted on February 8, 2021 and revised on December 29, 2022, has been updated to incorporate additional information and clarifications to the Project during the process of EFSEC review and data requests, along with modifications to the Project layout that were made in August 2023.

This final application incorporates Project changes and is submitted within 30 days after the conclusion of the adjudicative hearings (which were completed on August 25, 2023) in accordance with WAC 463-60-116(3). Revisions were also made to appendices, to include reports for additional surveys that were completed after submittal of the December 2022 revised application, as well as modifications resulting from the August 2023 layout changes. Electronic copies of the updated application, including confidential as well as public (redacted) versions of certain identified figures and reports, are being provided at this time. Hard copies will be provided on request by EFSEC.

We look forward to working with you as the application process moves through its next steps. If you have any questions, or require further information, please contact Dave Kobus at: dave@scoutcleanenergy.com

Sincerely,

Michael Rucker
