

APPENDIX U: CONSULTATION MATERIALS

HORSE HEAVEN WIND FARM CONSULTATION MATERIALS

1 INTRODUCTION

The following items represent a small sample of materials used to build awareness for the Horse Heaven Wind Farm proposal as well as to inform, consult and involve stakeholders and citizens.

2 STAKEHOLDER DISTRIBUTION LIST

The Applicant maintains the following contact list for interested stakeholder groups, including but not limited to business leaders and/or representatives from regional chambers of commerce; elected officials for cities and counties in the Mid-Columbia region; public utility districts, fire district representatives, school district representatives, and environmental advocacy groups.

Entity	Contact	Address	City	State	Zip Code
Benton City Chamber of Commerce	Dakota Renz	513 9th Street, P.O. Box 401	Benton City	WA	99320

4 PUBLIC OPINION SURVEY

A public opinion survey was conducted in December 2020 by EMC Research to help determine community sentiment about the proposal, including specific reasons for support or concerns related to renewable energy facilities, and identify issues of greatest interest to the local community.

The live telephone survey of 500 registered voters in Benton County carries an overall margin of error of ± 4.4 points at the 95 percent confidence interval and is representative of Benton County voters. Demographic questions were included to help identify any inequities in response rates and detect important differences in opinions among groups.

The results found that most voters think that government support for renewable energy (80 percent) and wind energy (70 percent) is important. There is strong support for the Horse Heaven Wind Farm both initially and after voters hear arguments for and against the project. Prior to hearing any messaging about the project, Benton County voters support the Project by a 19-point margin, 54 to 35 percent. After hearing supporters' and opponents' messaging, support for the Project increases to six-in-ten voters (61 percent support) with four-in-ten strongly supporting the Project. Among supporters, environmental benefits are the top reason for their support. Opponents mention that wind farms are not cost-effective and offered aesthetic objections.

Scout Clean Energy Survey of Registered Voters

Benton County, WA

SUMMARY FINDINGS

Optimism and Most Important Problem

Although close to a half of voters say things in Benton County are going in the right direction, 4-in-10 feel “things have gotten pretty seriously off on the wrong track.” The pandemic is voters’ top concern by a wide margin, with one-third of voters feeling that it is the most important problem facing the county. Mistrust of politicians and the state of the economy are both mentioned by more than 1-in-10.

“Do you feel that things in Benton County are generally going in the right direction or do you feel things have gotten pretty seriously off on the wrong track?”

“What do you think is the most important problem facing Benton County today?”

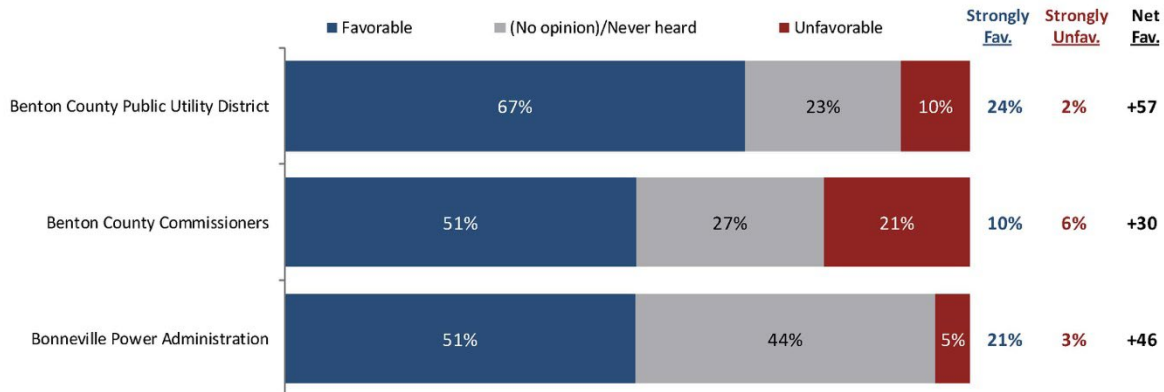

20-7992 Scout Clean Energy SUMMARY FINDINGS | 2

Favorable Ratings

Benton PUD is viewed positively by two-thirds of voters. By a 30-point margin, 51% to 21%, voters view the Benton County Commissioners favorably and there is almost no strong negative opinion.

“Please tell me if you have a strongly favorable, somewhat favorable, somewhat unfavorable or strongly unfavorable opinion of each one. If you have never heard of one, please just say so.”

20-7992 Scout Clean Energy **SUMMARY FINDINGS** | 3

Government Support for Renewable and Wind Energy

Most voters say government support for renewable energy sources (80%) and wind energy sources (70%) is important. There is limited opposition to government support for wind energy sources.

“Do you feel it is very important, somewhat important, not very important, or not important at all for state and local governments to support the development of [renewable/wind] energy sources to help meet Washington’s need for electricity?”

20-7992 Scout Clean Energy **SUMMARY FINDINGS** | 4

Horse Heaven Project Awareness

Close to half of voters say they are at least somewhat familiar with “the proposed wind energy project in Horse Heaven Hills.” Of those who say they are familiar with the project, most have heard just general information, however, one in five voters – which represents just 10% of all voters – do mention something negative.

“Are you very familiar, somewhat familiar, not very familiar, or not aware or not familiar at all with the proposed wind energy project in Horse Heaven Hills?”

What have you heard regarding the proposed project?	% of Aware	% of All
Windmills/turbines will be built	20%	9%
Project is in the works/being proposed	11%	5%
Not cost effective/Will not benefit the area	9%	4%
General negative/Unfavorable	7%	3%
Too large/Noisy/Ugly/Bad for the environment	6%	3%
Location	6%	3%
General positive/Favorable	6%	3%
Conflict/controversy about it	2%	1%
Will create jobs/Benefit the community	2%	1%
Can't recall/Don't know much/Just heard about	22%	10%
Other	4%	2%
Don't know/No response	4%	2%

20-7992 Scout Clean Energy SUMMARY FINDINGS | 5

Horse Heaven Project Support

Prior to hearing any messaging about the project, Benton county voters support the project by a 19-point margin, 54% to 35%. After hearing supporters' and opponents' messaging, support for the project increases to six-in-ten voters with four-in-ten strongly supporting the project.

“As you may know, there is a proposal to develop a wind farm in Horse Heaven Hills, just south of Tri-Cities. Given what you know today, do you support or oppose the proposal for this wind energy project in Horse Heaven Hills?”

20-7992 Scout Clean Energy SUMMARY FINDINGS | 6

Reasons for Support/Opposition

Among supporters, environmental impacts are the top reason for their support. Opponents' top reasons are that wind farms are not cost-effective and aesthetic/environmental objections.

"Why do you **[support/oppose]** the proposed wind energy project?"

Support (54%; n=264)	% of Supporters	% of All Voters
Clean, renewable energy/Get off fossil fuels	45%	24%
Diversify energy sources/Need more energy	15%	8%
General support	14%	7%
Good for the area/Brings jobs	9%	5%
Wind is plenty in the area	8%	4%
Push costs down	5%	3%

Oppose (35%; n=182)	% of Opponents	% of All Voters
Not efficient/Too costly to build	37%	13%
Ugly/Noisy/Bad location	20%	7%
General oppose	13%	4%
There are better alternatives	12%	4%
Will increase cost of energy	3%	1%
Don't have enough information	3%	1%

20-7992 Scout Clean Energy **SUMMARY FINDINGS** | 7

**¿TIENES PREGUNTAS
ACERCA DE LA ENERGÍA EÓLICA
EN WASHINGTON?**

**SCOUT
CLEAN ENERGY**

TENEMOS RESPUESTAS.

Debido a que las turbinas eólicas son una gran fuente de energía limpia y renovable, generalmente son recibidas con gran entusiasmo.

En Scout Clean Energy, también reconocemos que las grandes ideas a veces conducen a grandes preguntas. Es por eso que la transparencia con la comunidad local sobre nuestros proyectos de energía eólica es importante para todos aquí en nuestra empresa.

Estamos orgullosos de nuestros planes para desarrollar recursos de energía eólica y solar en el condado de Benton que sean de bajo impacto y de costo competitivo y agradecemos la oportunidad de discutir el proyecto con la comunidad local.

Visite nuestro sitio web para obtener información de contacto y más información sobre las preguntas más frecuentes.

Cuando esté armado con los hechos, estamos seguros de que encontrará que el parque eólico Horse Heaven representa un escenario en el que todos ganan para la comunidad local y la industria de Washington.

DID YOU KNOW? Every energy technology in the United States is subsidized, and wind energy is no exception. The Production Tax Credit (PTC) for wind provides a tax credit for each kilowatt-hour generated, over the first ten years of project operations. The PTC is a "non-refundable" credit which reduces the tax liability of the wind farm but is not a subsidy of public money flowing to the wind farm owner.

These credits help to level the playing field as oil, gas, and nuclear also receive federal subsidies that are in some cases permanent in the tax code. Wind energy still accounts for an extremely small share of all federal energy incentives with a cumulative total at less than 3%.

Federal Energy Incentives

WIND
Accounts for
Less than 3%
of total federal
energy incentives

A common concern we hear about wind energy is the risk of bird collisions with turbines. At Scout Clean Energy, we share the public's concerns about bird and bat mortality, which is why we site our projects carefully to minimize impacts.

According to the U.S. Fish and Wildlife Service, wind energy infrastructure causes a small fraction of all human-related bird deaths as compared to domestic cats, windows, and vehicles. Overall, wind turbines cause less than 0.01 percent of these losses in the United States.

FACT CHECK:

Annual estimated bird mortality from selected anthropogenic causes in the U.S.

DID YOU KNOW? Wind turbines have a recyclability rate of 85% to 90%. Components that can be salvaged and reused include the foundation, tower, gearbox and generator due to the metal these parts contain. Discarded turbine parts are nontoxic because the materials are inert and safe to dispose of in landfills. Additionally, wind turbines make up an extremely small amount of landfill waste in the U.S. at just .05 percent.

Learn more about wind turbine recycling and disposal here:
http://cleangridalliance.org/_/source/Turbine_Recycling.pdf

Wind turbines
85-90%
recyclable

Modern turbines are more efficient and affordable than those built even just a decade ago. The average cost of wind energy depends on turbine size, project size, and location. Life cycle analysis of similar models to what is proposed show that a typical wind turbine has an energy payback of 5-8 months and carbon payback of 1 year.
