Re: Avangrid Renewables – Badger  
Mountain Solar Project  
EFSC Docket No. EF210747

Dear EFSC Members:

The undersigned are the owners of the real property in Douglas County that is the site of the above-referenced solar project. The purpose of this letter is to voice our strong support of and commitment to this project.

This property is currently used for dryland agriculture purposes. There is no water rights associated with any of the property and there is no water to be made available in the future. It is located on the plateau above Wenatchee. There are no uses currently being made of the properties or the surrounding properties other than dryland agriculture.

We believe development of a solar project on the properties will have no adverse impacts on the neighboring properties. The project will be beneficial locally in terms of jobs, property tax and revenues and lease payments to the property owners. The project will provide a great source of “green” energy which we all recognize is necessary for the future.

We appreciate your consideration.
