My main concern for this project is the state of Badger Mountain road just east of Eastmont Blvd. It is slowly but surely sliding into the canyon beneath it. I am worried about the increase in heavy truck traffic during construction and the amount of stress placed on that section of the road. I live above the road and use it constantly and every few years the road sags, the sidewalk crumbles and they have to resurface . I hope this issue is taken into account when planning infrastructure improvements before this project is commenced.
