Re: SEPA Register 202201079, EF-210747

Dear Sonia Bumpus:

Thank you for the opportunity to comment on the scope of the Environmental Impact Statement for Badger Mountain Solar Energy Project, proposed by Avangrid Renewables, LLC. We have reviewed the documents and have the following comments.

WATER QUALITY

Project with Potential to Discharge Off-Site

The NPDES Construction Stormwater General Permit from the Washington State Department of Ecology is required if there is a potential for stormwater discharge from a construction site with disturbed ground. This permit requires that the SEPA checklist fully disclose anticipated activities including building, road construction and utility placements. Obtaining a permit may take 38-60 days.

The permit requires that a Stormwater Pollution Prevention Plan (Erosion Sediment Control Plan) shall be prepared and implemented for all permitted construction sites. These control measures must be able to prevent soil from being carried into surface water and storm drains by stormwater runoff. Permit coverage and erosion control measures must be in place prior to any clearing, grading, or construction.

More information on the stormwater program may be found on Ecology's stormwater website at: <http://www.ecy.wa.gov/programs/wq/stormwater/construction/>. Please submit an application or contact Wendy Neet at the Dept. of Ecology, (509) 454-7277 or email wendy.neet@ecy.wa.gov with questions about this permit.

Sincerely,

Gwen Clear
