Q1. **Are you part of an Agency or Organization?** No

Q2. **Share any comment**

Although this project is consistent with Yakima County's land use planning goals, I would prefer to see preference given to industrial solar projects that do not increase the industrial footprint of our landscape. Incentives should be given to projects that can work within the existing footprint of commercial and industrial buildings in Yakima and once all that rooftop and parking lot space is taken and adequate energy conservation measures are implemented within the City, then we can start looking at putting industrial solar complexes outside of the already disturbed footprint should the extra generation capacity truly be needed.

Q3. **Upload your document (optional)** not answered

Q4. **Upload a picture (optional)** not answered

Q5. **Did you also share a video?** No

Q6. **What is the title of your video?** not answered
