Q1. **Are you part of an Agency or Organization?** No

Q2. **Share any comment**

I wish to comment that due to the use of the available land being a questionable concern, why in the world would you not support the idea of putting solar panels on individual rooftops (beginning with the lowest income homes first)?? The only plausible answer I can come up with is that of a need for greed and the ability to continue charging all residents of Washington state exorbitant prices for the free use of the sun.... Thank you for allowing this comment...Anne.
