External Email

Good afternoon,

Please accept the attached letter as Benton County's comments (testimony) regarding the Wautoma Solar Project-Land Use Consistency Hearing. Additionally, Michelle Cooke, Benton County Planning Manager, will be available at this evening's Land Use Consistency Hearing to provide a brief summary (comment/testimony) of the project's consistency and compliance with the County's land use plans and zoning requirements.

If you have any questions, please let us know.

Thank you!

Greg

Re: Wautoma Solar Project Proposal

Dear Ms. Bumpus,

Thank you for the opportunity to comment on the land use consistency of the Wautoma Solar Project located in Benton County. Please accept this letter as Benton County's public comment and written testimony regarding the Wautoma Solar Project proposal.

As proposed, the Wautoma Solar Project (Project) is located in an area designated as Growth Management Act Agriculture in Benton County's Comprehensive Plan and is further designated as Growth Management Act Agricultural Zoning District (GMAAD) on the Benton County Zoning Map.

After a detailed review of the submitted application, Benton County finds the proposed Project is not consistent with the County's land use plans, specifically, the County's Growth Management Act Agricultural Zoning District (GMAAD) which does not allow or permit commercial solar facilities as an allowable, accessory, or conditional use. The rationale for prohibiting these commercial facilities in the GMAAD Zoning District is supported by both the Benton County Comprehensive Plan goals and policies and the Growth Management Act (GMA).

Benton County Comprehensive Plan

The Project area is designated Growth Management Act Agriculture in the Benton County Comprehensive Land Use Plan. This area is further designated as having an agricultural long-term commercial significance as directed by the Growth Management Act. The County's agricultural lands consist of dry land, irrigated, and rangeland land uses.

The proposed industrial use and location of the Project is not consistent nor compatible with the goals and policies of the County's Comprehensive Plan or its implementing regulations such as the County Zoning Ordinance and/or Critical Area Regulations. With a 4,573-acre project area, the loss of long term commercially significant agricultural land, for a non-agricultural use, is inconsistent with the County's goals and regulations which seek to protect agricultural and natural resource industries in Benton County.

Growth Management Goals:

The Growth Management Planning Goals are adopted to guide the development of comprehensive plans and development regulations¹ which in turn allow communities the ability to implement regulations to determine if a use (location, size and scale) is compatible with an existing area and whether it complies with the associated plans

¹ RCW 36.70A.020 Planning Goals

and documents adopted by the County. Notable GMA Goals, as it relates to the impacts of this Project, include the following:

- Natural Resource Industries - Maintain and enhance natural resource-based industries, including productive timber, agricultural, and fisheries industries. Encourage the conservation of productive forest lands and productive agricultural lands, while discouraging incompatible uses².
- Environment - Protect the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.

Loss of Long-Term Commercially Significant Agricultural Lands:

Benton County has highly productive agricultural soils with over \$900 million generated by Benton County crops and livestock per year. The land use designation for the proposed project area is Growth Management Act Agricultural. Agriculture, specifically long term commercially significant agriculture, is the cornerstone to Benton County's economy, natural resources industries, and way of life. The Plan states the following as it relates to agriculture and long term commercially significant agriculture in Benton County:

- NR Goal 1: Conserve and maintain agricultural land of long-term commercial significance as the local natural resource most essential for sustaining the County's agricultural economy.²
 - Policy 1: Conserve areas designated "GMA Agriculture" in the Comprehensive Plan for a broad range of agricultural uses to the maximum extent possible and protect these areas from the encroachment of incompatible uses.
 - Policy 3: Recognize that only uses related or ancillary to, supportive of, complimentary to, and/or not in conflict with agricultural activities are appropriate in areas designated GMA Agriculture.
- Agricultural land is defined as land primarily devoted to the commercial production of horticultural, viticultural, floricultural, dairy, apiary, vegetable, or animal products or of berries, grain, hay, straw, turf, seed, Christmas trees, finfish in upland hatcheries, or livestock, and that has long-term commercial significance for agricultural production.³
- Long-term commercial significance includes the growing capacity, productivity, and soil composition of the land for long-term commercial production, in consideration with the land's proximity to population areas, and the possibility of more intense uses of the land.⁴ GMA requires each county to designate appropriate agricultural lands that are not already characterized by urban growth and that have long-term significance for the commercial production of food or other agricultural products.⁴
- Growth Management Act Agriculture includes agricultural land (such as dryland, irrigated land, and rangeland) identified by the County based on the criteria established by the GMA. The GMAAD Zoning District conserves agricultural lands by establishing a 20-acre minimum parcel size and (with exceptions e.g., resort destinations, wineries) limits the range of other land uses to those which are dependent upon, supportive of, ancillary to, or compatible with, agricultural production as the principal land use.⁵ Agricultural land constitutes about 59 percent of the total land in Benton County.⁵

³ RCW 36.70A.030 (3) Definitions, Agricultural Land

⁴ RCW 36.70A.030 (15) Definitions, Long Term Commercial Significance

⁵ Benton County Comprehensive Plan, Section 3.3.2.5 Agricultural Land Use Designation, Page 44 (2021)

The Benton County Comprehensive Plan provides guidance for the protection, maintenance, conservation, and enhancement of the County's agricultural lands and their natural resource-based industries while discouraging incompatible uses. It further charges the County to reduce the inappropriate conversion of agricultural lands and assure that rural development is compatible with surrounding rural and agricultural areas.

This Project is not consistent with these directives and the goals and policies of preserving and protecting the County long term commercially significant agricultural lands.

Conservation of Critical Areas:

The Project is in an area designated for agricultural uses⁶ (Growth Management Act Agriculture) and accessory agricultural activities. The Project area further consists of designated critical areas, including wetlands, frequently flooded areas, geologically hazardous areas, and fish and wildlife conservation areas.

The proposed project is not consistent with the County's goals of protecting the critical areas and the County's Critical Area Ordinance. In accordance with BCC Title 15⁷, the County shall require a Critical Area Project Review to determine whether the project is likely to impact the functions and values of a critical area and whether the project adequately addresses the impacts and avoids impacts to critical areas associated with the project.

The Project area is located in a part of the Benton County with known wildlife habitat and habitat corridors. The Plan states the following as it relates to the Critical Area Goal related to sustaining the County's natural environment:

- CA Goal 4: Sustain a diverse, productive, and high-quality natural environment for the use, health, and enjoyment of County residents.⁸
 - Policy 2: Integrate natural resources and critical areas such as rivers, creeks, ridges, and slopes into a linked pattern of open lands where feasible, to serve multiple open space functions such as buffers, visual resources, recreation, and wildlife habitat/corridors.

Based upon the limited information provided, it's clear the project will have a negative impact on the County's critical areas, but additional information will need to be provided to determine the full impact and the minimum mitigation measures, if possible, for each development site.

Protection of Rural Character and Lifestyle:

The protection of rural character and lifestyle is paramount in Benton County. The goals and policies of the Comprehensive Plan seek to ensure that land uses are compatible with surrounding uses that maintain public health, safety, and general welfare. The policies aim to protect surrounding areas from incompatible uses that, if approved, would degrade the existing rural character which residents hold in high regard. The Comprehensive Plan states that Benton County must:

- Preserve rural lifestyles outside UGAs and incorporated areas while accommodating new population growth consistent with the protection of rural character and to encourage low impact recreational uses and protect open spaces that preserve rural character;⁹
- Promote industries that are diverse and support an agriculturally based economy; and

⁶ Benton County Comprehensive Plan, Appendix A, Figure 5 Future Land Use Designations Map (2021)

⁸ Benton County Comprehensive Plan, Section 2.5 Critical Areas, Page 23 (2021)

⁹ Benton County Comprehensive Plan, Section 2.2.3 Rural Lands, Page 14 (2021)

- Promote and protect tourism related to viticulture and other agricultural activities

The Benton County Comprehensive Plan discusses the community's priorities¹⁰ for Benton County. These include:

- Preservation of rural character;
- Protection of natural resources, hillsides, and open spaces;
- Limiting sprawl; and
- Protecting farmland.

The size and location of the of the proposed Project fails to preserve and protect the County's rural character and lacks consistency with the community's vision for Benton County as the Project proposes negative impacts to the County's natural resources and preservation of farmland.

Lack of Consistency with the Comprehensive Plan:

The County Comprehensive Plan requires the County to encourage long term conservation and stewardship of natural resources lands for the benefit of current and future residents. With over 59% of the County's total land area being located in the GMA Agricultural designation, these areas provide not only the agricultural land (dryland, irrigated land, and rangeland) which makes up the majority of the County's economy, but it also provides the open spaces and vistas which preserves the County's rural character.

The County Comprehensive Plan provides goals and policies that:

- Prevents the loss of the County's long term commercially significant agricultural land;
- Protects the County's naturally vegetated steep slopes, wildlife, and habitat;
- Supports a robust agricultural economy that focuses on preserving and protecting the rural character in Benton County that so many of its residents care about.

The location, size, and environmental impacts of this industrial scaled proposal are not consistent with the goals and policies of the Benton County Comprehensive Plan.

Benton County Zoning Regulations

To implement the Growth Management Act and the Benton County Comprehensive Plan, Benton County created the Growth Management Act Agricultural Zoning District (GMAAD). The Comprehensive Plan directs the County to conserve and maintain agricultural lands of long-term commercial significance as the local natural resource most essential for sustaining the County's agricultural economy,¹¹ and through this, the County created the Growth Management Act Agricultural Zoning District (GMAAD)¹².

Purpose of the Growth Management Act Agricultural District (GMAAD)

The Benton County Code states the purpose of the GMAAD Zoning District (chapter) is to meet the minimum requirements of the State Growth Management Act (Chapter 36.70A RCW) that mandates the designation and protection of agricultural lands of long-term commercial significance. The chapter protects the GMA Agricultural District (GMAAD) and the activities therein by limiting non-agricultural uses in the district to those compatible with agriculture and by establishing minimum lot sizes in areas where soils, water, and climate are suitable for

¹⁰ Benton County Comprehensive Plan, Section 1.2.3 Community Vision, Page 4 (2021)

¹¹ Benton County Comprehensive Plan, Section 2.3 Natural Resource Lands, Page 17 (2021)

¹² Benton County Zoning Ordinance, Chapter 11.17 Growth Management Act Agricultural District

agricultural purposes. This chapter is intended to work in conjunction with Chapter 14.05 BCC entitled "Right to Farm" which protects normal agricultural activities from nuisance complaints.¹³

Prohibited Use in the GMAAD Zoning District

The application proposes a non-agricultural use that is prohibited in the GMAAD Zoning District. The County's Zoning Code does not allow this Project as an allowed, accessory, or conditional use option¹⁴.

The applicant is requesting the EFSEC Council preempt applicable County land use plans and zoning ordinances, while also stating that the project is consistent with the County's planning provisions. Based upon the proposed location of the proposed project, the proposal does not meet the intent of RCW 36.70, is not consistent with the goals and policies in the County's Comprehensive Plan, and is a prohibited use in the GMAAD Zoning District. The County's land use codes and policies should be held in effect and should not be preempted by this proposal.

Thank you again for the opportunity to comment on this proposed project. We respectfully request that EFSEC deny the applicants request due to the lack of consistency with the local plans, ordinances, and associated environmental impacts.

Sincerely,

Greg Wendt
Director of Community Development
Benton County, Washington
