Tetra Tech was HIRED by Cypress Creek Renewables therefore it isn't hard to see that they would be intentionally mislead there findings so that there reports would be favorable to the company that has hired them for EVERY project they do.. Mochi does not hire a independent consultant firm to do there own studies which is negligence on her part putting our County, our Citizens, our Wildlife, Our Natural Resources like land water & air at even more risk. I ask you to please at least put all these real issues into your answer. Going green should not be toxic to the earth to the humans to the wildlife or water...
