Dear Ms Snarski,

I am opposed to the large scale solar project proposed in Klickitat County. I don't believe it is in accordance with the current land use laws. I think it's a travesty to turn beautiful areas into large solar farms because it's convenient for a company to hook into the grid at a particular place.

I also am concerned about the battery storage units there has been several fires in different states at these facilities. The windmill projects came in with big promises too. The windmill blades cannot be recycled and are being buried in some places after their 20-25 year life span. From my research we will face the same problems with recycling the solar panels when their life span is over.

Please note also note my opposition.

Thank you.

Sincerely,
Virginia Fitzpatrick
