Future of solar on farmland. [Solar Energy Expansion and its Impacts on Rural Communities](#) Farmland is being taken out of production. Topsoil is removed for the solar development rendering the farmland non-productive after solar site is decommissioned. All this makes America more reliant on foods produced in foreign countries who still use harmful chemicals that were outlawed in America. [Top U.S. Food Imports by Origin Country](#) The solar corporations only care about their profits not America or your future. Inslee and EFSEC are promoting the destruction of America. Greg Wagner C.E.A.S.E.

Top U.S. Food Imports by Origin Country

Julie R. Peasley

This infographic shows the top exporting countries for U.S. food imports, ranging from exotic fruits to meat, oi...

Solar Energy Expansion and its Impacts on Rural Communities

55% of new electricity generation capacity in 2023 was solar.
