Subject: C.E.A.S.E. CITIZENS EDUCATED ABOUT SOLAR ENERGY DANGERS OF BATTERIES

Hi, this fire, explosion and release of deadly fumes occurred in Missouri at a battery processing plant. This illustrates the real dangers of lithium-ion batteries whether stored in a warehouse, factory or BESS. Inslee and EFSEC aren't concerned about this danger because it will not be near their homes. Cypress Creek Renewables Carriger solar project being reviewed by EFSEC and slated for Goldendale, Washington will have 2-acres of BESS buildings full of these dangerous lithium-ion batteries. This is the citizens of Goldendale dangerous future. It's time for Inslee and EFSEC to wake up to the truth that batteries are dangerous and should not be used. Greg Wagner C.E.A.S.E.
