Hi, the people on the westside are ok with solar and BESS on the eastside but now that it's in their backyard it's different. Hypocrisy at its best. There must be enough sun light on this island to make this solar facility feasible so it's time for EFSEC to site all future solar/BESS facilities in western Washington and let them reap all the benefits. But wait there are no benefits just destruction. The destruction will continue with energy lobbyist Kurt Beckett as the chair of EFSEC. May 5th, the people of Klickitat County watched EFSEC in action in Goldendale when they granted expedited processing for the Carriger solar/BESS project before they accepted comments from the people negatively impacted by the project. This lack of concern about the impacted people illustrates just how heartless and out of control EFSEC is. Damn the people full speed ahead. Greg Wagner C.E.A.S.E. From KING

'It will ruin the charm of our island': Islanders push back on solar grid

People on the tiny San Juan island of Decatur said the grid would ruin their community's character.
