The Carriger solar project will do great harm to the existing farmland and citizen forced to live near this useless solar project. It is not consistent with the current land use and never will be. Solar is a scam which is destroying our country and state and EFSEC is conspiring with the corrupt corporations in their efforts. These panels are toxic just as CCR stated in ASC they contain cadmium telluride a toxic. That will leach into our soil and potable water aquifer harming the citizens. 2 acres of lithium-ion batteries storing 63 million watts of energy is a danger. When thermal runaway happens and an explosion occurs releasing hydrogen fluoride and cyanide gases citizen will be killed. This doesn't concern EFSEC or Inslee as you live far from this proven danger. Inslee and EFSEC have no plan on how the recycle or dispose of dead solar panels so they will end up in the landfills broken and releasing toxics in the land and water. Water we depend from our wells. Our life blood. Again, no problem You and Inslee live on the westside and this won't harm you. I've watched you carelessly site other project without any concerns for their negative impact on the environment citizen animals. EFSEC and dictator Inslee are a heartless bunch of thugs. Force all the useless so-called clean energy project on the citizen on the eastside. Time for EFSEC to stop your heartless ways. Site these projects next to your homes but that will never happen. What goes around comes around

you'll get yours. Ken
