EXECUTIVE SUMMARY

On behalf of Cypress Creek Renewables, LLC (CCR), and Carriger Solar, LLC (Carriger), WSP has conducted a Phase I environmental site assessment (Phase I ESA) for approximately 2,261.24 acres in Klickitat County, Washington to expand CCR's renewable energy footprint through the development of the Carriger Solar, LLC project (hereinafter referred to as the "Project" and "subject property").

The Phase I ESA was conducted in accordance with the U.S. Environmental Protection Agency (EPA) Standards and Practices for All Appropriate Inquiries as required under Section 101(35)(B) of the Comprehensive Environmental Response, Compensation, and Liability Act and referenced in Title 40 Code of Federal Regulations, Part 312; the ASTM International Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13); and WSP's proposal to CCR (the Client) for the work, dated July 7, 2021.

The goal of this Phase I ESA was to identify recognized environmental conditions in connection with the subject property based on a records review, the site visit, and interviews.

• WSP did identified one recognized environmental condition (REC) in connection with the subject property. A debris pile consisting of tires, empty paint cans, and various scrap metal was identified on parcel 04151200000300 along a stream channel near the central portion of the parcel. No stains or odors were observed, but this is a potential hazmat source due to the presence of the empty paint cans. There is potential for the contents of the cans to have leaked and impacted the subsurface in this area. WSP recommends that the debris pile be removed. After removal of the debris pile, if evidence of contamination is observed (staining, odors, etc.), WSP recommends that soil samples be collected.

WSP did not identify any known or suspect historical recognized environmental conditions or *de minimis* conditions in connection with the subject property. WSP performed a wetland delineation in July 2021, and wetlands were identified on site, which is considered a business environmental risk (BER).

1.0 INTRODUCTION

1.1 SCOPE OF WORK

WSP conducted a Phase I environmental site assessment of the Carriger Solar Site (approximately 2,261.24 acres) located in rural Goldendale, Klickitat County, Washington (subject property), at the request of CCR (the Client) and Carriger Solar, LLC. The Phase I environmental site assessment was conducted in accordance with the U.S. Environmental Protection Agency (EPA) Standards and Practices for All Appropriate Inquiries (AAI) as required under Section 101(35)(B) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as specified in Title 40 Code of Federal Regulations (CFR), Part 312; the ASTM International Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13); and WSP's proposal to CCR for the work, dated July 7, 2021.

The goal of this Phase I ESA was to identify recognized environmental conditions in connection with the subject property based on a records review, the site visit, and interviews.

The assessment is based on a visit to the site by Bridget Wojtala, WSP environmental scientist, who was supervised by Fameeda Ali, WSP environmental manager and environmental professional.

The following work was conducted during completion of the environmental assessment:

- A site visit was conducted on July 26 through July 29, 2021. The site visit covered all parcels included in the project area. In addition, WSP observed the adjoining properties from the site or adjacent public thoroughfares.
- Photographs of the site were taken to document conditions during the site visit. The photographs are presented in Appendix B.
- WSP conducted interviews with the following people:
 - Tai Wallace of CCR (the "user" of this Phase I environmental site assessment), to obtain information relevant to identifying the possibility of a recognized environmental condition in connection with the subject property.

WSP was able to contact and interview only two of the site owners. The significance of this data gap is discussed in Section 10.0.

- WSP conducted a review of information contained in federal and state environmental databases, as obtained from the sources noted below:
 - WSP retained Environmental Data Resources, Inc. (EDR) to conduct a database search of the site and properties within AAI- and ASTM-specified search radii to identify releases or threatened releases and to help assess the likelihood of problems from migrating hazardous substances or petroleum products. The search (including the approximate minimum search distances) was conducted in accordance with the standards established by Section

101(35)(B) of CERCLA, 40 CFR 312.26, and ASTM E 1527-13. The results of the database search are presented in Appendix D.

- WSP conducted a review of standard historical sources and state and local agency inquiries, as defined by the ASTM Standard. The following sources were reviewed:
 - Aerial photographs, historical topographic maps, historical fire insurance maps, and city directories, as summarized in Section 4.1 of this report and included as Appendix C.
 - Historical and site-specific information was requested and/or obtained from state and local agencies, including the Klickitat County Building Department and County Assessor.
- A chain of title was not provided by the Client.

This Phase I ESA was conducted in accordance with ASTM E 1527-13. Asbestos-containing building materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality (except as related to a potential release of a hazardous substance or petroleum product), industrial hygiene, lead-based paint, lead in drinking water, polychlorinated biphenyls (PCBs) in building materials (e.g., paint or caulk), mold, radon, regulatory compliance, and wetlands are non-scope considerations under Section 13.1.5 of ASTM E 1527-13 and were not included in WSP's Phase I ESA process.

1.2 DISCLAIMER

Client acknowledges and agrees that this report was prepared solely on its behalf and functions solely as a Phase I ESA. By accepting this report, Client acknowledges and agrees that it may in part rely upon sources, either written or oral, that WSP considers reliable but which are not guaranteed or independently verified by WSP.

Where Client is required to disseminate this report, either by law or in connection with Client's business activities, to any other party to whom this report is not addressed (the "Third Party"), Client agrees to notify the Third Party of the terms of this disclaimer who in turn shall be bound by such terms. Any Third Party wishing to rely on the information and opinions contained herein does so at its own risk in absence of a written letter of reliance provided by WSP.

1.3 TERM OF REPORT VIABILITY

In accordance with ASTM E 1527-13 and AAI, this report is presumed to be valid for a period of up to 180 days before the date of a future property transaction by the intended user, with the validity period starting on January 18, 2022. In addition, this report may be used for a period of up to one year before the date of a future property transaction by the intended user, provided that the following components are conducted or updated within 180 days of the date of purchase or the date of the intended transaction.

- Interviews with owners, operators, and occupants
- Searches for recorded environmental clean-up liens

- Reviews of federal, tribal, state, and local government records
- Visual reviews of the property and adjoining properties
- Declaration of the environmental professional responsible for the assessment or update

1.4 ENVIRONMENTAL PROFESSIONAL DECLARATION

This report was prepared under the supervision of Fameeda Ali, environmental manager of WSP. Qualifications will be provided upon request.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in Section 312.10 of 40 CFR Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Fameeda Ali, Environmental Professional

tameade Ali

2.0 SUBJECT PROPERTY

2.1 SITE SETTING

The subject property is located in rural Klickitat County, Washington, northwest of the city of Goldendale, Washington, and includes all or portions of parcels 04151200000300, 04151100000600, 04153100000100, 04151400000100, 04151400000300, 04151400000600, 04150100000500, 04151200000200, 04151100000500, 04151100000100, 04150100000300, 04150100000100, 04160600000400, 05163116080100, 05152500000900, 05152500000500, 05152514120300, 05152514120400, 05152514120200, 05152514120100, 05152600000500, 05153500000900, 05153500000200, 05153500001200, 05153500001300, 05152600000600, and 05153500001500 (Appendix A, Figure 1). The 27 parcels are located along Knight Road, Mesecher Road W, Fish Hatchery Road, Pine Forest Road, Tucker Hill Road, Highway 142, and Butts Road. The area is composed primarily of agricultural and residential land uses, with some forestland on the eastern portions of the subject property. This Phase I ESA includes both the northern and southern portions of the project area, a transmission line right-of-way connecting the project parcels along Knight Road, and a gen-tie line which is intended to interconnect with the existing Bonneville Power Administration (BPA) Knight Substation (Appendix A, Figure 2).

The subject property was accessed with property owner approval from driveways and nearby roads. The table below lists each parcel within each portion of the project area, the owner of each parcel, and the size of the lot.

Portion of Project Area	Parcel Number	Parcel Owner	Size (acres)
Northern	04150100000500	Ken and Melody Hill LLC	80
Northern	04151200000200	Ken and Melody Hill LLC	160

2.2 PHYSICAL SETTING

According to the United States Geological Survey (USGS) 7.5-minute Centerville and Goldendale Quadrangle maps (2013), the elevation of the project site ranges from approximately 1,500 feet above mean sea level (msl) in the southern portion to approximately 2,000 feet above msl in the northern portion. The local topography gently slopes down to the south/southwest, but is generally flat.

The nearest surface water bodies are Bloodgood Creek located approximately one mile to the east, Blockhouse Creek located approximately 1.17 miles to the west, Mill Creek located approximately 1.36 miles to the west, and Little Klickitat River located 2.15 miles to the south of the subject property.

Based on the local topography and proximity of surface water bodies, local groundwater flow is presumed to be to the south/southwest. However, local subsurface geologic and manmade features can affect groundwater flow; therefore, this groundwater flow interpretation is only an estimate based on surface observations. Review of water well records filed with the USGS Washington Water Science Center indicate that depth to groundwater at the subject property may be approximately 150 feet below ground surface.

2.3 CURRENT OPERATIONS

The subject property is currently a mix of undeveloped and agricultural land. Cattle and horses are present on several of the properties within the project area, and some parcels are currently used for wheat farming.

2.4 PAST OPERATIONS

The subject property was historically used for agricultural purposes, and some portions were forested or undeveloped land.

2.5 PREVIOUS ENVIRONMENTAL REPORTS

WSP environmental staff completed a Phase I Environmental Site Assessment for only the northern portion of the project area (parcels 0415010000500, 04151200000200, 04151100000500, 04151100000100, 04150100000300, 04150100000100, 04160600000400, 05163116080100, 05152500000900, 05152500000500, 05152514120300, 05152514120400, 05152514120200, 05152514120100, 05152600000500, 0515350000900, 05153500000200, 05153500001200, 05153500001300, 05152600000600, and 05153500001500) in June 2020. WSP did not identify any known or suspect recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental conditions, or *de minimis* conditions in connection with the subject property and did not recommend any additional investigation. A wetland delineation was performed by Ecology & Environment in May 2020, and wetlands were identified on site, which is considered a business environmental risk (BER).

3.0 ADJOINING PROPERTIES

3.1 CURRENT USES OF ADJOINING PROPERTIES

Based on interviews with site owners, a review of available city directories, and a visual "drive-by" review, the current uses of properties adjoining the subject property are summarized below:

Direction	Operator Name	Address	Property Use
North	Various residential and	Various	Residential
	agricultural properties		Agricultural
			Undeveloped land
South	Various residential and	Various	Residential
	agricultural properties		Agricultural
			Undeveloped land
East	Various residential and	Various	Residential
	agricultural properties		Agricultural
			Undeveloped land
West	Various residential and	Various	Residential
	agricultural properties		Agricultural
			Undeveloped land
	Goldendale Fish Hatchery	130 Hatchery Lane	Fish hatchery

An aboveground storage tank (AST) is present on a parcel adjacent to the north of the northern section of the subject property. The storage tank appeared to be empty, with no staining or obvious signs of spills, and is unlikely to pose a threat to the Project.

No recognized environmental conditions that may adversely affect the subject property were identified at adjoining properties. No recognized environmental conditions that may adversely affect the subject property were identified at adjoining properties. Additionally, none of the adjoining properties were identified by the

regulatory database search as having had a reportable release or other environmental incident

3.2 HISTORICAL USES OF ADJOINING PROPERTIES

Aerial photographs from 1947 to 2016 (Appendix C) show agricultural and residential buildings located in the surrounding area of the subject property. No other past uses of surrounding properties were identified from the historical sources reviewed.

Based on WSP's review, no evidence was found indicating an existing release or a material threat of a release of any hazardous substances or petroleum products into structures on the subject property or onto the ground, groundwater or surface water of the subject property from historical use of adjoining properties. No other historical sources of information regarding past uses of the adjoining properties were reasonably ascertainable.

Further details on past use of adjoining properties are provided in Section 5.1 - Historical Records.

WSP did not identify any recognized environmental conditions with respect to past uses of adjoining properties.

4.0 SITE RECONNAISSANCE

WSP environmental staff performed a reconnaissance of the subject property on July 26 through 29, 2021. The reconnaissance consisted of systematically traversing the subject property and viewing adjacent properties from roadways and public access areas. Photographs documenting reconnaissance observations are included in Appendix B.

The majority of the subject property is undeveloped agricultural land. Portions of the north-eastern areas of the subject property are heavily forested, as well as portions of the project area surrounding the Goldendale Fish Hatchery (see Figure 2). An out-of-use irrigation system (Appendix B, Photo 9) that appeared to be powered electrically is located on the central area of parcel 05163116080100, near Pine Forest Road, and small wooden building structures are present on the eastern portion of the parcel (Appendix B, Photo 12). A horse barn is located on the western edge of the parcel 04151400000300 on Hill Road (Appendix B, Photo 34). Figures 3A through 3C show the locations of the structures and features on the subject property. The table below summarizes whether or not potential sources of hazardous substances were identified on-site during the site reconnaissance.

POTENTIAL SOURCES OF HAZARDOUS SUBSTANCES	PRESENT?
Heating oil tanks	No
Aboveground Storage Tanks (ASTs)	No
Underground storage tanks (USTs), fill and vent pipes, fuel dispensers	No

Other hazardous substance containers	No
Hazardous waste generation	No
Oil water separators, dry wells or floor/storm drains	No
Septic systems	No
Stains or odors	No
Stressed vegetation	No
Solid waste	Yes
Suspect asbestos-containing materials	No
Suspect lead-based paint	Unknown
Potential PCB-containing equipment	No
Fluorescent or mercury vapor light bulbs	No
Treated timbers	No
Water wells or monitoring wells	No

4.1 HAZARDOUS SUBSTANCES

No hazardous substances were observed during the site reconnaissance.

4.2 SOLID WASTE

A debris pile consisting of tires, empty paint cans, and various scrap metal was identified on parcel 04151200000300 (Appendix B, Photo directly adjacent to a stream channel near the central portion of the parcel. This parcel was not previously surveyed. No stains or odors were observed, but this is a potential hazmat source due to the presence of the empty paint cans, which could have contained lead-based paint.

4.3 ABOVEGROUND STORAGE TANKS

No aboveground storage tanks were observed within the subject property. One aboveground storage tank is located to the north of parcel 0515260000500 on an adjacent property.

4.4 UNDERGROUND STORAGE TANKS

During the site reconnaissance, no visible evidence of the presence of USTs (such as fill pipes, vent pipes, or dispensers) was discovered.

4.5 SUMPS, PITS, AND FLOOR DRAINS

There are no sumps, pits, or floor drains located within the project area.

4.6 PITS, PONDS, AND LAGOONS

No pits, ponds, or lagoons were observed during the site reconnaissance. This does not pertain to natural wetlands or ponded/depressed wetlands.

5.0 HISTORICAL RECORDS REVIEW

5.1 HISTORICAL RECORDS

WSP retained EDR to conduct a search for historical records pertaining to the subject property. The records search produced the following results:

- Aerial photographs dated 1947, 1952, 1955, 1972, 1975, 1981, 1996, 2006, 2009, 2013, and 2017.
- Historical topographic maps from 1957, 1983, 2013, and 2014.
- City directories dated 1992, 1995, 2000, 2005, 2010, 2014, and 2017.
- Sanborn fire insurance maps were not received, there is no Sanborn coverage at the subject property.

The EDR historical records are summarized below and included in Appendix C. Based on WSP's review of historical documents, WSP did not identify any evidence of suspect land-contaminating activities, such as landfills or bulk storage tank farms, on or in the immediate vicinity of the subject property.

5.1.1 Aerial Photographs

WSP reviewed aerial photographs for the years 1947, 1952, 1955, 1972, 1975, 1981, 1996, 2006, 2009, 2013, and 2017, which were obtained from EDR and were used to clarify the past land uses described below. Copies of the aerial photographs are included in Appendix C.

Year	Land Use Descriptions			
1947-2006	The subject property is mostly undeveloped or agricultural land, with some forested areas and few residential houses located on site and on adjacent properties. The Goldendale Fish Hatchery at 130 Fish Hatchery Lane is owned and operated by Washington Department of Fish and Wildlife (WDFW) and located on the western boundary of parcel 04151100000600.			
2009-2017	The subject property conditions are similar to those currently observed. The BPA Knight Substation exists to the east and south of the northern section of the subject property, directly adjacent to the eastern boundary of parcel 05153500001300, and there are more residential houses within and around the subject property.			

5.1.2 Sanborn Fire Insurance Maps

WSP requested Sanborn Fire Insurance Maps from EDR, but the subject property is unmapped. A copy of the Sanborn Report is included in Appendix C.

5.1.3 Historical Topographic Maps

WSP reviewed historical topographic maps provided by EDR dated 1957, 1983, 2013, and 2014. These maps show a few residential houses located on site and on adjacent properties, as well as the Goldendale Fish Hatchery. The topography of the project area is generally flat with an elevation of around 1,500 to 2,000 feet. A steep hill is located on the northern portion of parcel 04151400000300. Historical topographic maps are included in Appendix C.

5.1.4 Reverse City Directories

WSP reviewed reverse city directories published by EDR for 1992, 1995, 2000, 2005, 2010, 2014, and 2017, to identify past land uses. Listings from the city directories for the target property, as well as adjoining streets, are shown in the table below. The City Directory Report is included in Appendix C.

Year	Location	Description
1992	2996-3077 Highway 142	Residential
	93-2531 Knight Road	Residential
1995	2996 Highway 142	Hess Livestock
	3077-3115 Highway 142	Residential
	93-584 Knight Road	Residential
2000	2996-3115 Highway 142	Residential
	93-584 Knight Road	Residential
2005	2937-3115 Highway 142	Residential
	93 Knight Road	Hill View Ranch
	202-253 Knight Road	Residential
	394 Knight Road	Precious Ponies
	510-584 Knight Road	Residential
2010	2996-3115 Highway 142	Residential
	93 Knight Road	Hill View Ranch
	202-515 Knight Road	Residential
	559 Knight Road	J&J Building & Remodeling
2014	2996-3077 Highway 142	Residential
	93-515 Knight Road	Residential
	559 Knight Road	J & J Building & Remodeling
2017	2996-3077 Highway 142	Residential
	93-515 Knight Road	Residential
	559 Knight Road	J & J Building & Remodeling

6.0 REGULATORY DATABASE SEARCH AND REVIEW

WSP retained EDR to conduct a database search of the site and properties within AAI- and ASTM-specified search radii to identify releases or threatened releases and to help assess the likelihood of problems from migrating hazardous substances or petroleum products. The search (including the approximate minimum search distances) was conducted in accordance with the standards established by Section 101(35)(B) of CERCLA, 40 CFR 312.26, and ASTM E 1527-13 (see Appendix D).

6.1 SUBJECT PROPERTY

The Goldendale Hatchery site is owned and operated by WDFW and is listed in the ALLSITES and MANIFEST databases. This site is located at 130 Hatchery Lane on a parcel within the subject property, though the fish hatchery itself is excluded from the

project area. The fish hatchery is downgradient from the subject property. The Washington Department of Ecology (Ecology) database listings for this facility are a Tier 2 Hazardous Waste annual report and a water quality permit. Based on the absence of documented releases and location of the hatchery, this site is unlikely to pose a threat to the Project.

Facility Name and Location	Facility	Distance	Direction	Permit Type/
	ID#	(miles)	(N,S,E,W)	Facility Status
Goldendale Hatchery 130 Hatchery Lane	11525	0.085	W	HAZWASTE WATQUAL

6.2 ADJOINING PROPERTIES

The BPA Knight Station site is listed in the ALLSITES and MANIFEST databases. This site is located at 403 Knight Road and is a Tier 2 Hazardous Waste site. The substation powers transmission lines that serve the area and was constructed in 2013. Facilities classified as Tier 2 sites are those that store 10,000 pounds or more of a hazardous chemical or 500 pounds or less, depending on the chemical, of an extremely hazardous chemical on site at any one time. These facilities must report annually. The ALLSITES listing indicates that the BPA Knight Station filed a report in 2013, and there is no record of any spills or contamination associated with the site. Based on its recent construction date and the absence of documented releases, the BPA Knight Station is unlikely to pose a threat to the Project.

Facility Name and Location	Facility	Distance	Direction	Permit Type/
	ID#	(miles)	(N,S,E,W)	Facility Status
BPA Knight Station 403 Knight Road	18871	0.085	E	HAZWASTE

7.0 LOCAL FILE REVIEW

WSP reviewed Ecology's online Cleanup Site Search, which identifies pollution sites in the state of Washington. No pollution sites were identified for the subject property or surrounding properties.

WSP reviewed the Klickitat County interactive mapping service. One building footprint was identified on parcel 05163116080100, where small wooden building structures were observed during the site reconnaissance. No pollution sites were identified for the subject property or surrounding properties.

WSP reviewed survey records from the Klickitat County Department of Public Works. Subject property surveys show no on-site septic systems or other concerns. All residential buildings are excluded from the Project. No hazardous conditions were identified during this review.

No "commonly known" information was identified during the local records review.

8.0 KEY PERSON INTERVIEWS

WSP personnel reached out to all current property owners who are intending to lease or sell their land for the solar project. Mr. Karl Amidon, owner of the parcels on Mesecher Road W (parcels numbers 0415010000300, 04160600000400, and 04150100000100) and Mr. Jim Hill, owner of several parcels on Hill Road and Highway 142 (parcel numbers 04151400000600 and 04151400000300), stated that they are not aware of any hazardous conditions or contamination on their property in the past or present, and the land has always been agricultural or undeveloped. The other individual landowners have not responded to phone calls and, therefore, have not been interviewed.

WSP was unable to interview other previous property owners or occupants of the subject property; however, sufficient information was available through other sources to determine historical operations that were conducted at the subject property. Therefore, this data gap does not affect WSP's ability to identify recognized environmental conditions at the subject property.

9.0 USER-PROVIDED INFORMATION

WSP interviewed Tai Wallace of CCR regarding the following (the User Questionnaire is provided in Appendix E):

- Environmental cleanup liens that are filed or recorded against the site: CCR is not aware of any environmental cleanup liens.
- Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry: CCR does not know of any activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.
- Specialized knowledge or experience: CCR does not possess any specialized knowledge that might indicate the past or present use of hazardous materials.
- Relationship of the purchase price to the fair market value of the property: CCR states that the purchase price is not significantly below fair market value.
- Commonly known or reasonably ascertainable information about the property: CCR has stated that the past uses on the property were agricultural.
- The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation: CCR is not aware of any contamination indicators associated with the property. A previous Phase I ESA identified a debris pile on parcel 04151200000300.

10.0 DATA GAPS

WSP identified the following data gap during the Phase I ESA:

• WSP was unable to interview any previous property owners or occupants of the subject property; however, sufficient information was available through other sources to determine historical operations that were conducted at the subject

property. Therefore, this data gap does not affect WSP's ability to identify recognized environmental conditions at the subject property.

11.0 CONCLUSIONS AND RECOMMENDATIONS

WSP conducted a Phase I ESA of approximately 2,261.24 acres of land in Klickitat County, Washington. This assessment was conducted in accordance with the EPA Standards and Practices for AAI; ASTM E 1527-13; and WSP's proposal to CCR, dated July 7, 2021. Any exceptions to, or deletions from, ASTM E 1527-13 are described in Sections 1.1 and in WSP's proposal. The assessment has revealed the following REC in connection with the subject property:

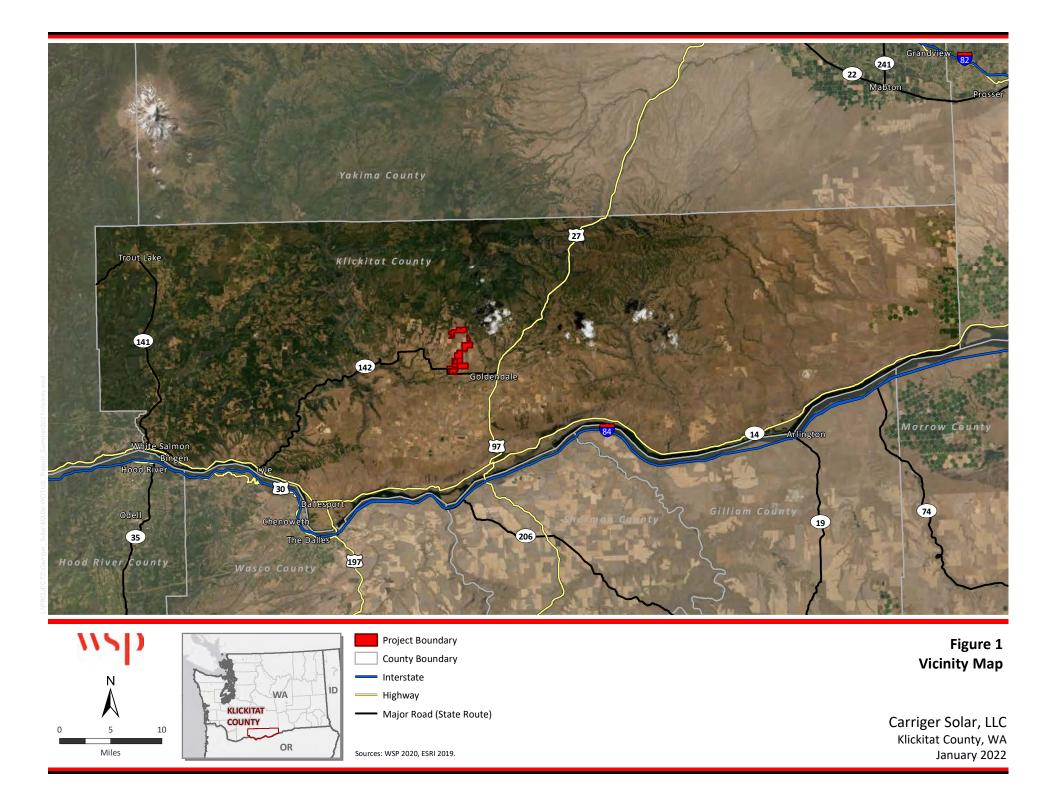

• A debris pile consisting of tires, empty paint cans, and various scrap metal was identified on parcel 04151200000300 along a stream channel near the central portion of the parcel. No stains or odors were observed, but this is a potential hazmat source due to the presence of the empty paint cans.

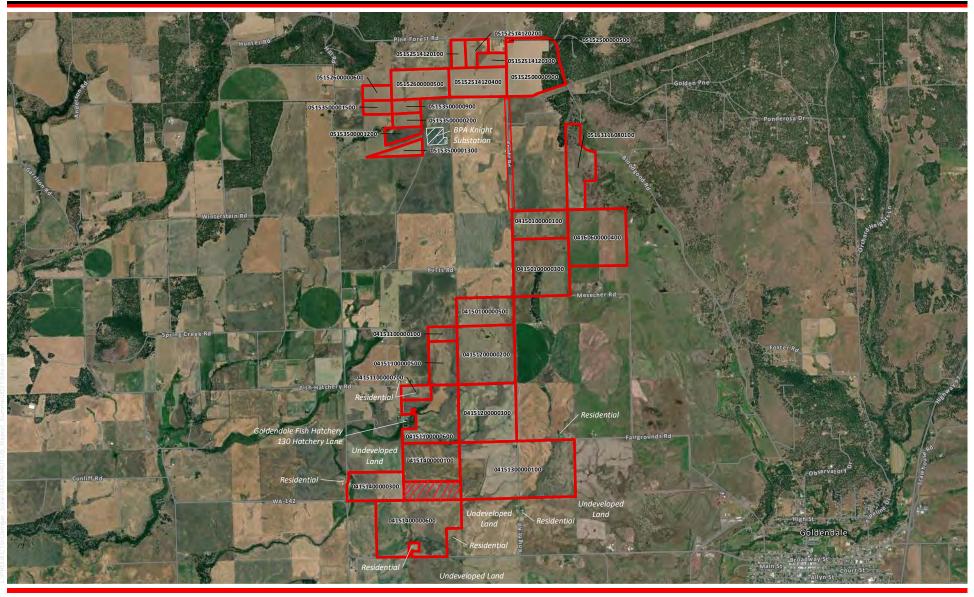

There is potential for the contents of the paint cans to have leaked and impacted the subsurface in this area. WSP recommends that the debris pile be removed. After removal of the debris pile, if evidence of contamination is observed (staining, odors, etc.), WSP recommends that soil samples be collected.

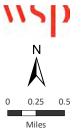

WSP did not identify any known or suspect historical recognized environmental conditions or *de minimis* conditions in connection with the subject property. WSP performed a wetland delineation in July 2021, and wetlands were identified on site, which is considered a business environmental risk (BER).

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by WSP were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

WASHINGTON GOVERNMENT WELL RECORDS SEARCHED

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at

least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after

August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Wetlands Data: Wetland Inventory Source: Department of Ecology Telephone: 360-407-6121

Water Wells

Source: Department of Health Telephone: 360-236-3148 Group A and B well locations.

Water Well Listing

Source: Public Utility District Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

Ecology Well Logs

Source: Department of Ecology Telephone: 360-407-7294

Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid. Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

Oil and Gas Well Listing

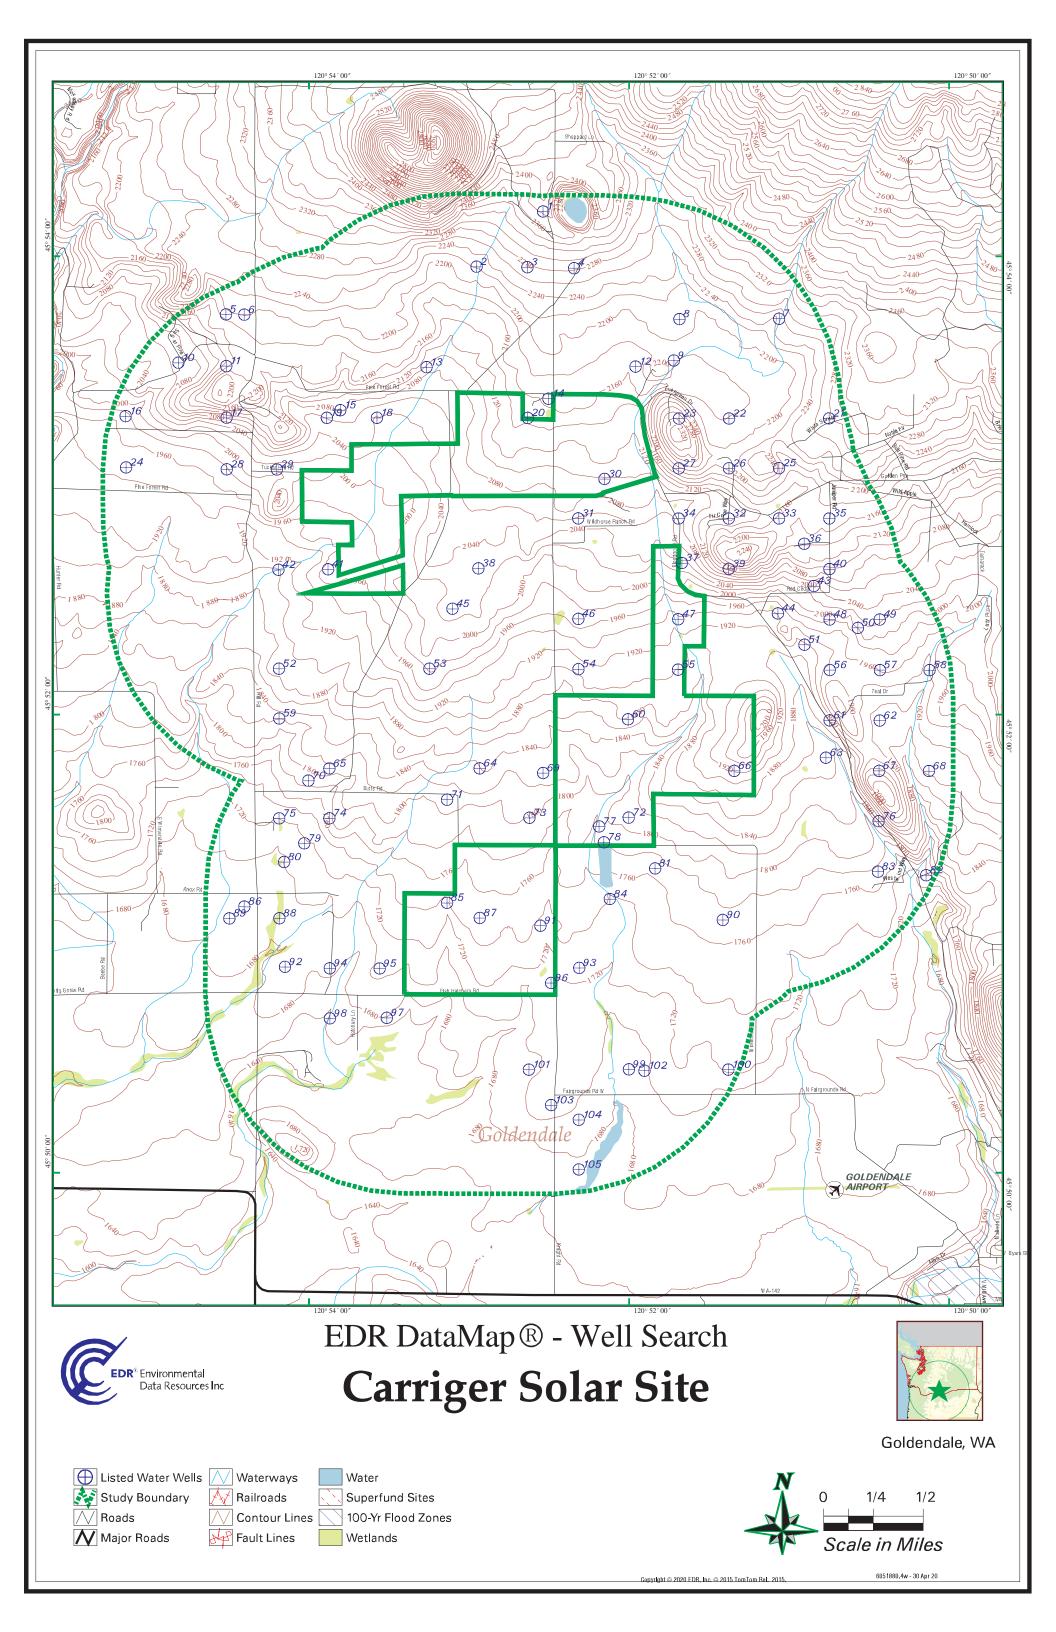

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SUBJECT PROPERTY INFORMATION

ADDRESS

CARRIGER SOLAR SITE GOLDENDALE, WA 98620

TARGET PROPERTY SEARCH RESULTS

The Target Property was identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

ALLSITES: Facility/Site Identification System Listing

A review of the ALLSITES list, as provided by EDR, and dated 02/03/2021 has revealed that there is 1 ALLSITES site within approximately 0.5 miles of the requested target property.

Site	Address	Direction / Distance	Map ID / Focus Map(s)	Page
GOLDENDALE HATCHERY	130 HATCHERY LN	N 0 - 1/8 (0.085 mi.)	A1 / 2	24
Facility Id: 11525				

EXECUTIVE SUMMARY

Other Ascertainable Records

MANIFEST: Hazardous Waste Manifest Data

A review of the MANIFEST list, as provided by EDR, and dated 12/31/2019 has revealed that there is 1 MANIFEST site within approximately 0.25 miles of the requested target property.

City	EDR ID	Site Name	Site Address	Zip	Database(s)
GOLDENDALE	2013038364		GOODNOE HILL		ERNS

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date Data Arrived at EDR: 05/03/2021 Telephone: N/A

Next Scheduled EDR Contact: 10/11/2021 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 02/22/2021 Date Data Arrived at EDR: 03/30/2021 Date Made Active in Reports: 06/17/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Last EDR Contact: 06/29/2021

Next Scheduled EDR Contact: 10/25/2021 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SUBJECT PROPERTY INFORMATION

ADDRESS

CARRIGER SOLAR SITE GOLDENDALE, WA 98620

TARGET PROPERTY SEARCH RESULTS

The Target Property was identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

ALLSITES: Facility/Site Identification System Listing

A review of the ALLSITES list, as provided by EDR, and dated 05/13/2021 has revealed that there are 2 ALLSITES sites within approximately 0.5 miles of the requested target property.

Site	Address	Direction / Distance	Map ID / Focus Map(s)	Page
BPA KNIGHT STATION Facility ld: 18871	403 KNIGHT RD	N 0 - 1/8 (0.022 mi.)	1/2	30

NO SITES FOUND

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

PTAP: PTAP Site Listing

A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

LF TACOMA/PIERCE: Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

WASHINGTON GOVERNMENT WELL RECORDS SEARCHED

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at

least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after

August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Wetlands Data: Wetland Inventory Source: Department of Ecology Telephone: 360-407-6121

Water Wells

Source: Department of Health Telephone: 360-236-3148 Group A and B well locations.

Water Well Listing

Source: Public Utility District Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

Ecology Well Logs

Source: Department of Ecology Telephone: 360-407-7294

Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid. Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

Oil and Gas Well Listing

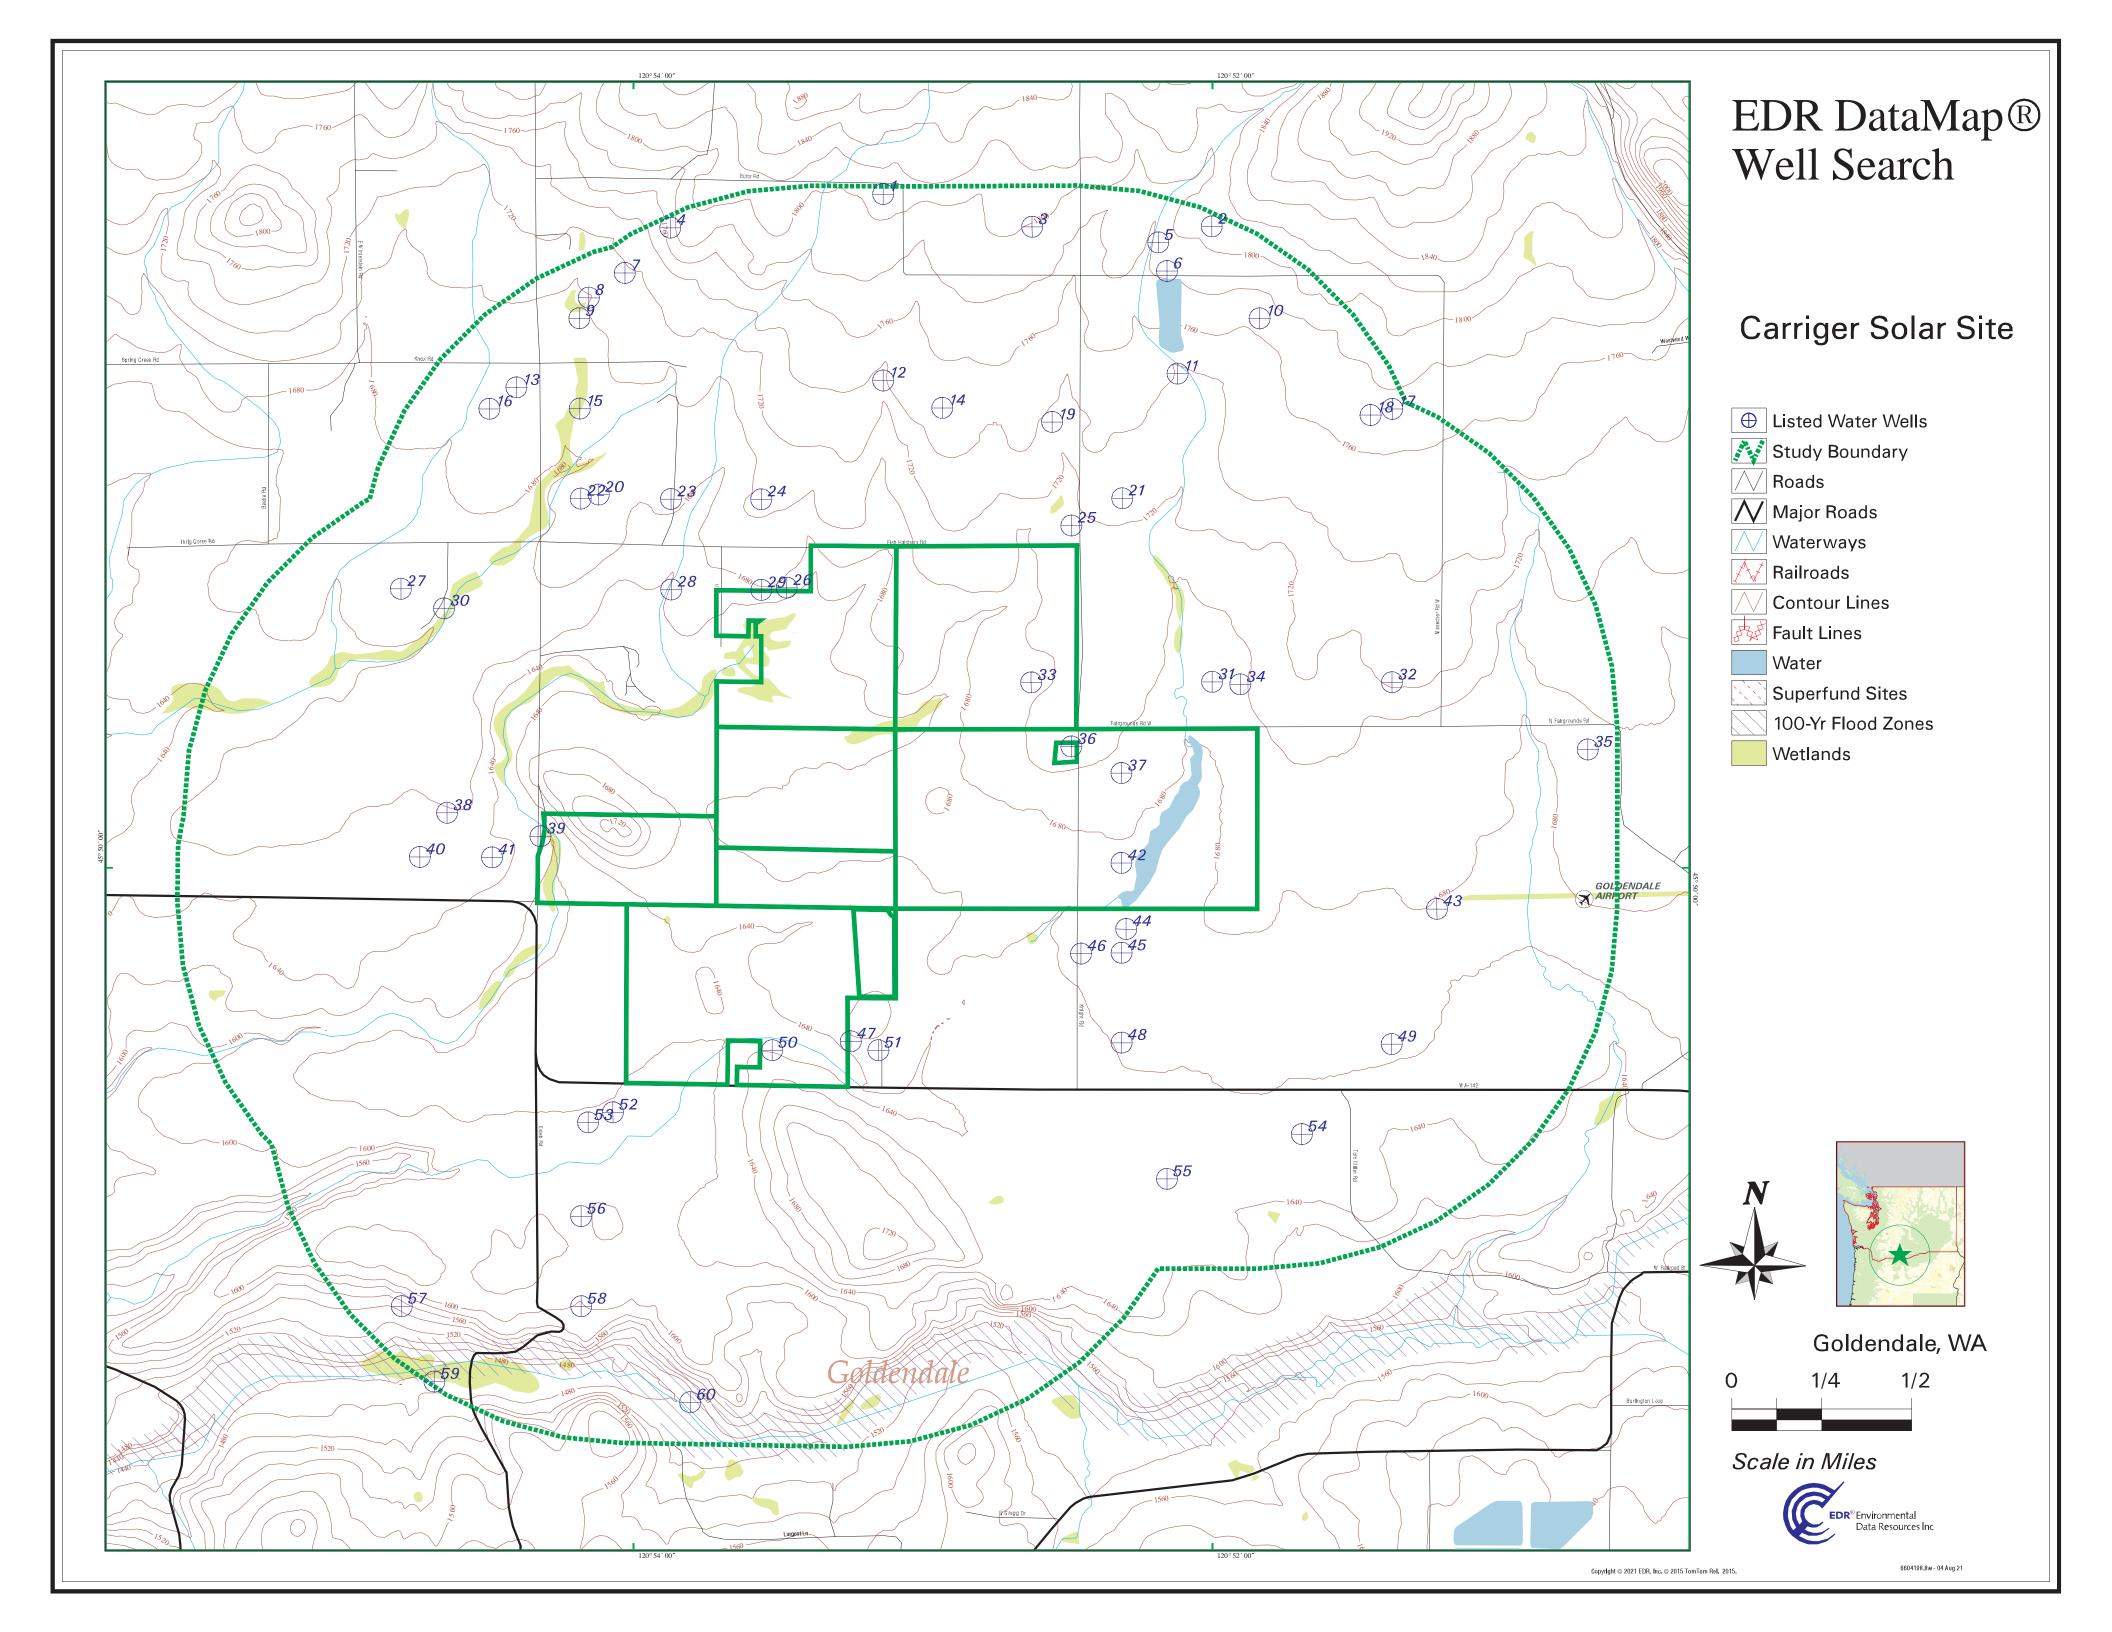

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

WASHINGTON GOVERNMENT WELL RECORDS SEARCHED

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at

least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after

August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Wetlands Data: Wetland Inventory Source: Department of Ecology Telephone: 360-407-6121

Water Wells

Source: Department of Health Telephone: 360-236-3148 Group A and B well locations.

Water Well Listing

Source: Public Utility District Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

Ecology Well Logs

Source: Department of Ecology Telephone: 360-407-7294

Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid. Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

Oil and Gas Well Listing

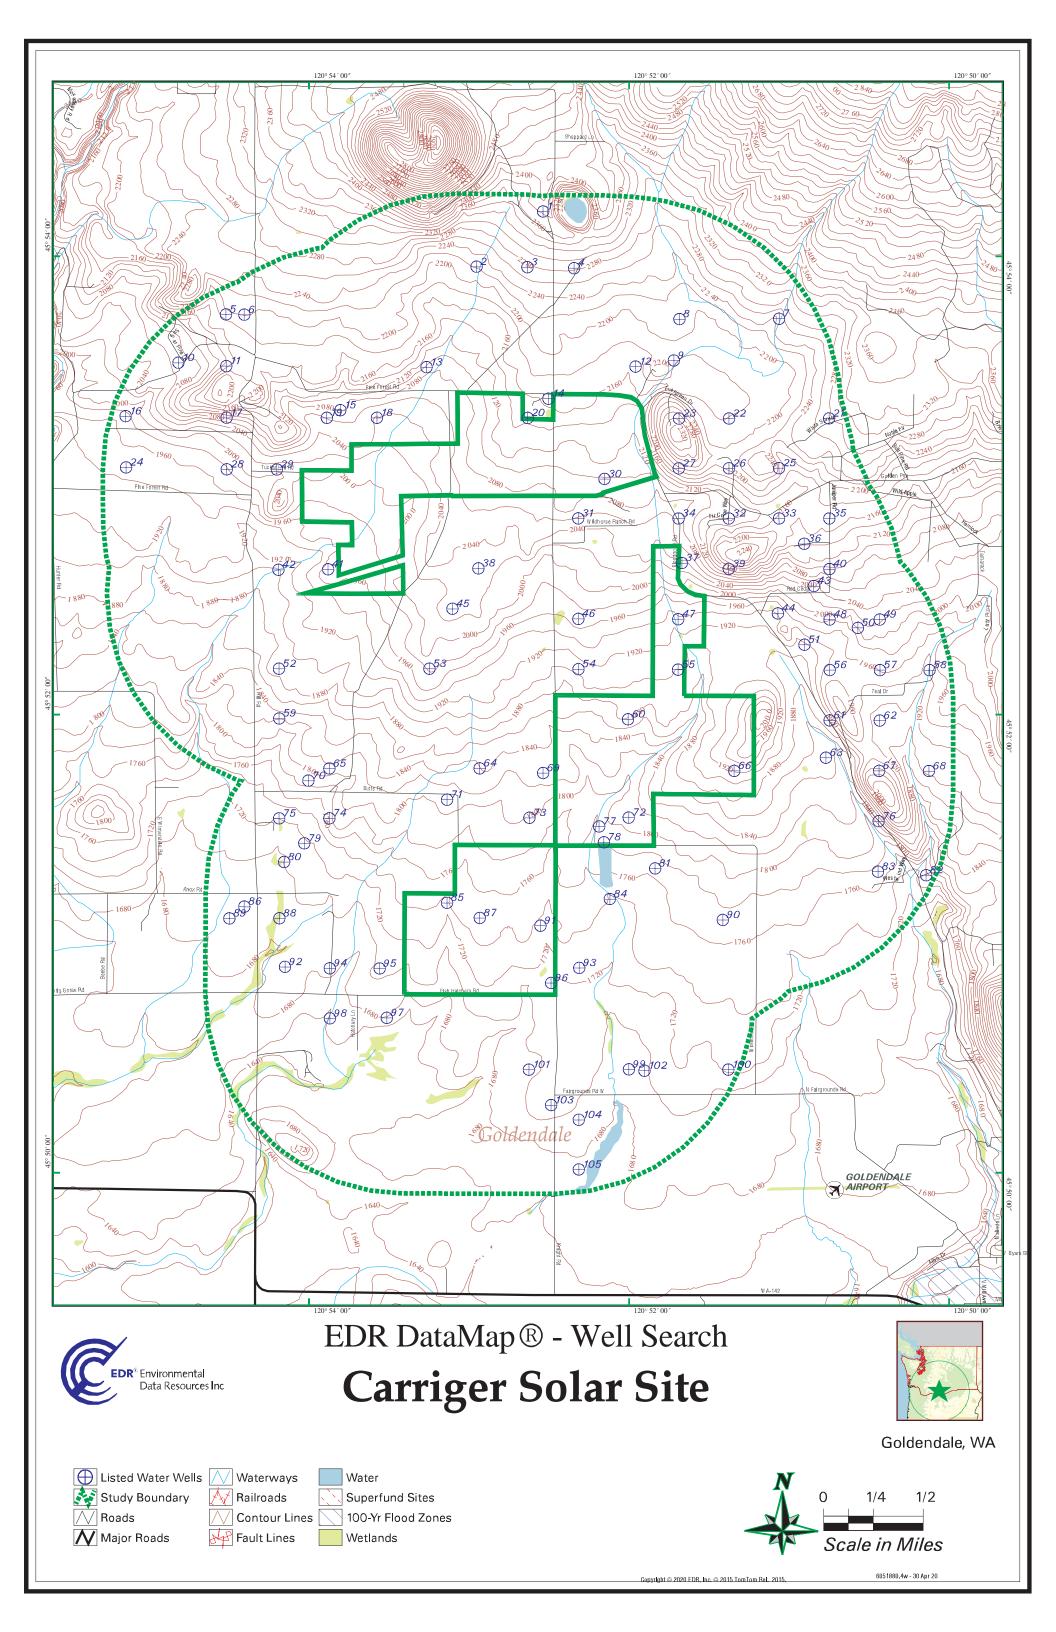

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

APPENDIX E

USER QUESTIONNAIRE

Cypress Creek Renewables User Questionnaire (ASTM Standard E1527-13)

This form is to be completed by the user of the Phase I ESA to the best of this user's ability and the extent of this user's knowledge. A good faith effort to answer the following questions for the environmental professional allows the user to qualify for Landowner Liability Protections (LLPs), as defined by the Small Business Liability Relief and Brownfields Revitalization Act of 2001.

1.	Environmental Cleanup Liens (40 CFR 312.25)
	Do you know of any environmental liens that may be filed or recorded against the site under federal, tribal, state, or local law? If yes, please provide details. ☐ Yes ☐ No
2.	Activity and Use Limitations (AULs) (40 CFR 312.26)
	Do you know of any AULs including, but not limited to, engineering controls and any land use restrictions or institutional controls that may be in place at the site or filed under federal, tribal, state or local law? If yes, please provide details. Yes
3.	Specialized Knowledge (40.CFR 312.28)
	Do you possess any specialized knowledge (due to business and/or personal familiarity with the site) that might indicate the past or present use of hazardous chemicals, fuels, or other hazardous substances and materials? If yes, please provide details. \square Yes \blacksquare No
4.	Fair Market Value (FMV) (40 CFR 312.29)
	Knowing that a purchase price significantly below fair market value could indicate an environmental concern, is the purchase price significantly below fair market value? ☐ Yes ☐ No
	If yes, have you considered whether this is due to the potential presence of contamination on site? If yes, please provide details. \square Yes \blacksquare No
5.	Contamination indicators (40 CFR 312.31)
	Do you know of any obvious indicators that would suggest the presence of contamination on site? If yes, please provide details. \square Yes \blacksquare No

6. Brief history:

If known, what were the past uses of the property? Agricultural. A precious Phase I ESA identified a debris pile consisting of tires, empty paint cans, and various scrap metal on parcel 04151200000300.

If applicable, what chemicals may have been present at the property? N/A

If relevant and available, please provide information related to spills, chemical releases, environmental cleanups, and/or other potential sources of contamination. N/A

- Please provide the ideal point of contact for arranging site visits and the contact phone number. Ken & Melody Hill (509) 773-5949, Diane Powers (808) 248-8694, Karl Amidon (509) 773-3229, Wes Smith (208) 859-3251, Jim Farrer (541) 980-1266, Craig Schimschok (503) 780-0054, Judith Lackstrom (509) 773-6141, Carl Conroy(509)773-5394, Jim Hill (509)250-0087, and Hillsview LLC(509)630-2762.
- 8. Please list the current owner(s) of the property.
 Ken & Melody Hill, Diane Powers, Karl Amidon, Wesley & Mary Smith, Jim Farrer, Craig Schimschok, Judith Lackstrom, Carl Conroy, Flying H Ranch(Jim Hill), Jim and Hill Trust(Jim Hill), and Hillsview LLC.
- Please include any access restrictions / site constraints (including any confidentiality requirements)
 if present and known.
 Inform the landowners 24 hours in advance prior to going on site.
- 10. Please provide the reason for conducting the ESA. Planned development of a solar farm.
