Subject: Expedited Review Extension Request for Carriger Solar, LLC

Dear Ms. Snarski,

Cypress Creek Renewables, LLC, on behalf of Carriger Solar LLC, is hereby requesting that the Energy Facility Site Evaluation Council (EFSEC) extend the Expedited Process review deadline for the Carriger Solar, LLC Application for Site Certification (ASC) from June 10, 2023 to August 17, 2023.

The Carriger Solar Project Application for Site Certification (ASC) was filed with EFSEC on February 10, 2023, and included in the submission a request that EFSEC conduct its review using the Expedited Process (Chapter 463-43 in the Washington Administrative Code). In the Expedited Process, EFSEC Council is required to determine eligibility within four months (120 days) of application submittal, which would be June 10, 2023.

Cypress Creek Renewables respectfully asks EFSEC Council to extend this four-month review period by two additional months to account for initial scheduling delays associated with the Initial Public Meeting and Land Use Consistency Hearing as well as the need for additional information to supplement the ASC. Cypress Creek Renewables appreciates the importance of a thorough review and understands that more time will be needed for EFSEC to do so.

Sincerely,

DocuSigned by:
